

## International Full Power Relay FPR I International 3.0

This unit comes with 250mm of high grade, low loss wiring connected to the ROSTRUM side of the board. This is ready for you to wire up to your plug or connectors used at your track.

To the right of the image you will see the connections for the CONTROLLER. These are the usual wiring colour standard.

- COM ... RED (brake and negative from the power supply)
- OUT ... BLACK (power from the controller to the track)
- IN ... WHITE (power from the power supply)
- 

Connect your controller to these points and fit the board back into the housing. Secure the base with the screws you removed when opening it.
