

C22

TILLER

 **MADE IN
BRITAIN**

► [SEE WEBSITE](#)

The **CAMON C22** is the ideal tool for preparing garden borders, vegetable patches, and allotments for the upcoming planting season. With its potent engine and sturdy digging tines, it can easily churn through even the most stubborn soils, offering a more effective and efficient alternative to traditional spade digging.

CAPABILITIES

The **CAMON C22** is a powerful machine for turning your soil into usable areas for planting. It has been built for all types of operator from domestic to commercial, having been made to last and combines this with a very simple system to operate. Just pull the single lever and the power of the **C22** will quickly do the work for you.

The tines of the **CAMON C22** are not only crafted from hardened steel, but unlike many tillers they are also individually replaceable. The tiller's drive train, made from premium components, ensures both ease of maintenance and demonstrated dependability.

The foldable handlebars simplify the machine's vehicle transport and storage, while the handy front wheel ensures the **CAMON C22** can be easily manoeuvred to its required location.

SPECIFICATION

ENGINE	HONDA GX160
DIGGING WIDTH	64CM
