CHOOSING THE RIGHT POWER UNIT

In order to ensure you get best value for money, and choose the right power unit from the outset, we recommend you read the following information which may help you make the best decision for your long term requirements.

What is the difference between a Two Wheel Tractor / Crusader / Commander?

The key difference is that the **handlebars on the Two Wheel Tractors rotate 180°**, the Crusader and Commander ranges do not.

This allows the Two Wheel Tractors to operate both front mounted implements such as mowers and snow clearing, as well as rear mounted implements such as rotavators and ploughs.

The **Crusader and Commander** power units will operate **front mounted implements** only, such as mowers and snow clearing attachments.

Also consider which attachments you may need in the future.

As a general rule, the larger the machine, the more attachments become available.

For steep banks and sloping areas the Bank Commander is the recommended machine. Fitted with a Honda banks engine and twin wheels for extra traction and stability, the Bank Commander will work on slopes up to a 40° gradient. This machine can be fitted with front mounted attachments only.

To summarise, it is vital that you consider everything you want to do with the machine - not only right now, but also in the future.

If you have any questions at all please call our sales team on 01444 247689 who will be happy to offer assistance and advice.

Tasks	Suitable Machines		
Rotavating	Two Wheel Tractor		
Ploughing	Two Wheel Tractor		
Cultivating	Two Wheel Tractor		
Grass cutting	Two Wheel Tractor	Crusader	Commander
Clearing snow	Two Wheel Tractor	Crusader	Commander
Cutting grass on slopes	Commander (with GX390 banks engine only)		
Hay baling	Two Wheel Tractor (740/750/770HY)		Commander

Important! The BCS 660HY power unit is fitted with a quick release coupling so all implements to fit the BCS 660HY will require an additional coupling at £115.00+vat. The machine is supplied with a coupler for the first implement.

This is a different coupling system to the other power unit in the Commander range.

NOTES (for identifiers on pages 4-16)

- ¹ The 52cm (20") rotavator is narrower than the 738 wheel track.
- ² There are three styles of roller available for the power harrow and stone buriar - mesh, or solid, or cage (bars) - it is important to state which roller you require.
- ³ The Short Oil Transmission is recommended for power units with GX160, GX200, and GX270 engines.
The Long Oil Transmission is recommended for power units with GX270, GX340, GX390, and diesel engines.
- ⁴ When fitted to the 740, 770HY or 630 the 100cm (40") rotary mower requires an Implement Extension or Quick Release Coupling. See Accessories on page 8.
- ⁵ When fitted to 738 (diesel), 740 (petrol and diesel), 750 (petrol and diesel), 770HY (petrol and diesel), 630WS, or 660HY WS, additional weights will be required to balance the implement and power unit. See Accessories on page 8.
- ⁶ When Turf Wheels and Lug Wheels are fitted to 700 series and Crusader 600 (not Commander) wheel spacers will be required.
- ⁷ Not suitable for use with Cultivator Kit which requires minimum of 49cm (19") Spade Lug Wheels.
- ⁸ Other engine options are available. See page 4.
