

babybrezza® bottle

For your Child's Safety and Health WARNING!

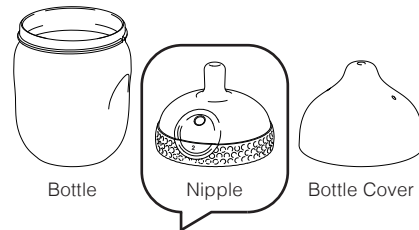

- Always use this product with adult supervision. This is not a toy.
- Keep all components not in use out of the reach of children.
- Wash each component before the first use and always after each use.
- Inspect the product thoroughly before each use. To prevent a possible choking hazard, test strength of nipple regularly by pulling hard on nipple. Inspect regularly, especially when a baby is teething. If nipple becomes cracked, torn, or otherwise damaged, discontinue use immediately. Do not attempt to enlarge nipple hole, as this will cause tearing.
- Do not leave bottle nipples in direct sunlight or heat, or leave in disinfectant (sterilizing solution) for longer than recommended, as this may weaken the nipple.

- Use the Baby Brezza Bottle only with Baby Brezza Bottle Nipples.
- Never use bottle nipples (feeding teats) as a soother or pacifier.
- Continuous and prolonged sucking of fluids will cause tooth decay.
- Always check food temperature before feeding.
- Avoid applying too much pressure while feeding as this could cause baby to choke.
- **Do not warm contents in a microwave** with bottle sealed. **Remove nipple and nipple cover.** **Take extra care when microwave heating.** Always stir heated food to ensure even heat distribution and test the temperature before serving.
- This product is dishwasher safe (top rack only).
- Do not use abrasive cleaning agents or anti-bacterial cleaners.
- We recommend replacing nipples every 2 months.

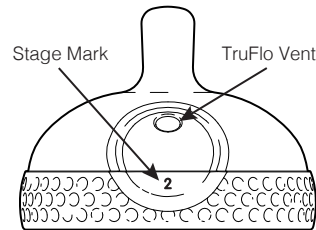

Bottle Use

Before first use, wash all components in warm, soapy water, then rinse thoroughly, or wash in the top rack of your dishwasher. Then sanitize all components in boiling water for 5 minutes. If using an electric sterilizer, please follow the manufacturer's instructions.

Always wash each component immediately after each use.

**NOT FOR USE IN
MICROWAVE STERILIZERS**

Nipple stages are marked on the collar of the nipple. Use the appropriate nipple stage for your baby. See opposite side for more details.

Ensure that the nipple is securely fastened to the bottle to optimize the TruFlo Vent system when feeding your baby.

Brezza Nipple Stages

 **slow flow**
0-3 months

 **medium flow**
3-6 months

 **fast flow**
6+ months

For Glass Bottles

CAUTION:

Sudden temperature changes can cause glass bottles to crack or break.

Glass Brezza Bottles are resistant to sudden temperature changes of 176°F/80°C.

Be sure the Glass Brezza Bottle and liquid are at the same temperature when filling or warming.

Glass bottles can break, so please always have an adult hold the bottle while feeding.

CAUTION:

Do not use the nipple/collar in microwave sterilizers.
Sterilize nipple collar in boiling water or with an electric steam sterilizers.
