Rev. April 2017

Outstanding Specifications & Features

			
	PR10	PR20	PR30
Product Description	low-cost 4.3" touch screen recorder supports 1, 2, 3 or 6 universal analog inputs	intermediate 5.6" touch screen up to 24	high-resolution analog inputs
Input numbers	3, 6 channels	3, 6, 12, 18, 24 channels	large 12.1" high-resolution touch screen recorder supports up to 48 universal analog inputs
True universal inputs	Thermocouples: J, K, T, E, B, R, S, N, L, U, P, W5, W3, LR, A1, A2, A3, M RTD: Pt50, Pt100, Pt200, Pt500, Pt1000 ($\alpha=0.00385$), Pt50, Pt100 ($\alpha=0.00391$), Cu10 ($\alpha=0.00427$), Cu50, Cu100($\alpha=0.00426, 0.00428$), Ni100, Ni200, Ni500,	JPt50, JPt100, JPt200, JPt500, JPt1000 ($\alpha=0.003916$) Ni1000 ($\alpha=0.00617$) mA, V, mV	
Scan Rate / Data Log Interval	analog inputs scanned every 100ms / Data log interval configurable,	100ms, 1, 2, 5, 10, 20, 30 seconds, 1 or 2 minutes.	
Math, External channels, Batch Data Log, Custom display, FDA, CFR21 part 11	Math functions, including Counters & Totalizers, are standard with other listed functions in Plus Version Firmware		
Display	4.3" TFT wide touch screen	5.6" TFT touch screen	12.1" TFT touch screen
Resolution	480 x 272	640 x 480	1024 x 768
MTFB backlight at 25°C	30,000 hrs	30,000 hrs	60,000 hrs
Backlight	LED		
Screen saver, Email	Yes		
CPU Speed	ARM Cortex-A8, 1Ghz		
Internal Flash memory	256 MB		
RAM	256 MB		
Ethernet	Modbus TCP/IP		
RS-232/422/485	optional RS-232 or RS-422/485 Modbus RTU		
SD card slot / USB ports / Printer Output	1 SD Card Slot / 2 USB ports one front with 2nd back / Printer output via USB ports		or LAN
Pulse input	optional DI card offering either logic or high frequency pulse counter		
Process control	PID ramp & dwell	PID ramp & dwell	N/A
START / STOP key	to start / stop data logging and to turn display only off (not the recorder)		
Calibration	field calibration may be accomplished for all analog input types as well as offering	Offset and Gain adjustments	
Multilingual	convenient for local users by offering 20 languages including English, Japanese, Danish, Italian, Polish, Russian, Dutch, Korean, Thai, Turkish, Portuguese,	Chinese(simplified, traditional), French, German, Spanish, Swedish, Brazil Portuguese, Czech, Greek and other languages negotiable	
PC software Historical Viewer+ Configuration	Standard – on PC view, print, export (.csv) all data and other files and		to create/edit unit configuration files
Extensive software Data Acquisition Studio	optional, same as Historical Viewer but supports real-time remote		monitoring of multiple PR units, data logging at PC and more
Power supply	90-250VAC or 11-36VDC		
Outer dimensions (W x H x L)	144mm x 144mm x189mm / 5.67" x 5.67" x 7.44"	144 x144 x189	5.67"x5.67"x7.44"
Mounting depth	171mm / 6.74"	171mm / 6.74"	171mm / 6.74"
DIN Panel cutout (W x H)	137mm x 137mm / 5.4" x 5.4"	137mm x 137mm	5.4" x 5.4"
Protection	IP65 front, IP20 rear		
Operating temperature	0°C to 50°C		
Storage temperature	-30°C to 70°C		
Agency Approvals	UL, cUL, CE, RoHS	UL, cUL, CE, RoHS	RoHS

Overview

The PR Series paperless recorders offer outstanding specifications and features.

The PR Series includes the low-cost 4.3" PR10, intermediate 5.6" PR20 and the high-end 12.1" PR30 each offering a host of standard and optional features. These features include easy to use touch screen interface, 100msec sampling rate, monitor external channels (via TCP/IP or serial modbus), normal & high frequency pulse inputs, batch recording, write free-hand messages directly on the display, supports field calibration, multilevel security, customizable display, Web Server, email, 20-languages, TCP/IP, SD slot, two USB ports and can meet the requirements for CFR21 part 11, AMS2750E*, JCAHO, typical HACCP protocols and other standards.

* PR Series T/C input types J, K, T, N, U, L, P and RTD meet AMS2750E accuracy requirements

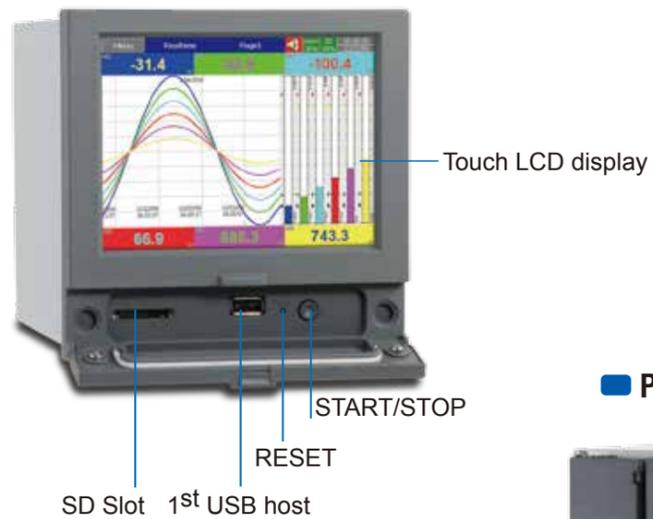

PID Process Control Function for PR10 & PR20 provides a combination process controller with profiling as well as powerful paperless recorder functions.

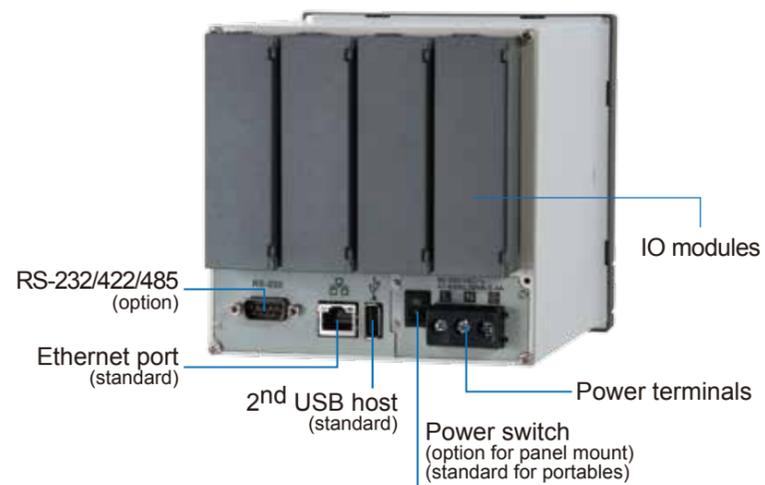

Modular Hardware Design

Front view, Back view

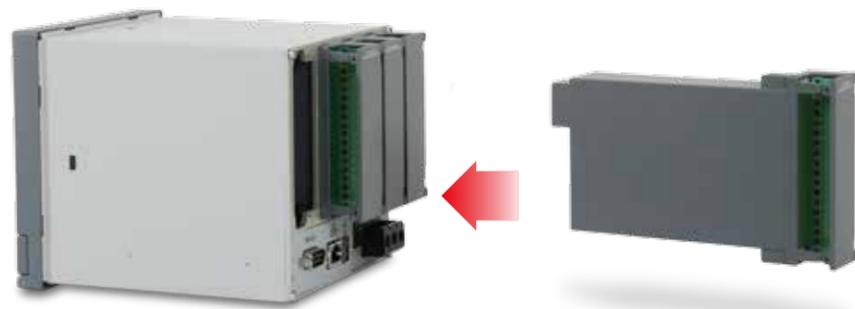

PR20 Front view

PR20 Back view

IO modules allow for easy for expansion

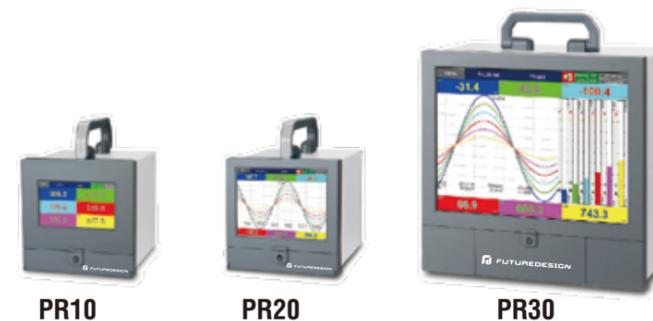

Input & Output Modules

AI206 6 AI (6 analog inputs)	AI203 3 AI (3 analog inputs)	RO206 6 relay outputs	
			
DI206 6 DI (6 digital inputs)	RD233 3 relays + 3DI	AO206 6 AO (6 analog outputs)	PC201 single loop process control
			
 PR10 (4 Slots, up to 6 AI)	 PR20 (4 Slots, up to 24 AI)	 PR30 (16 Slots, up to 48 AI)	

Portable recorders and the front access door Security key

Portable recorders

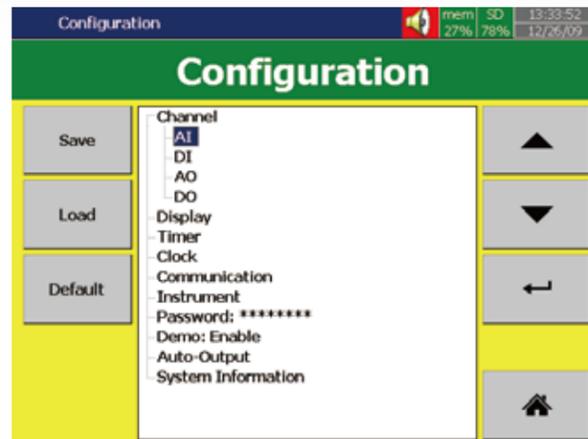

Security key

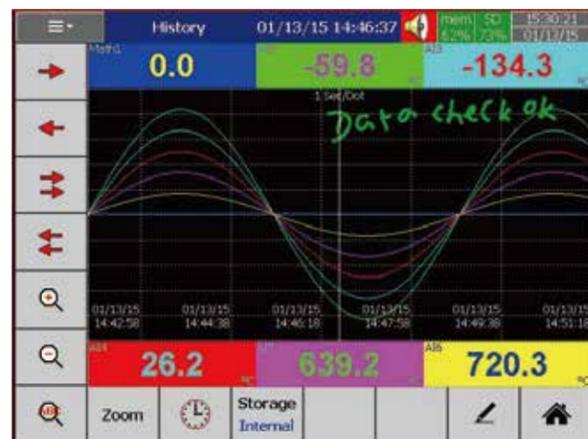

Ease of Use and Multiple Features

Configuration Menu provides easy navigation & selection

Supports free-hand messages directly on the touch screen

Circular display (PR30 only)

PR30 offers Circular Chart view allowing easy replacement for 1 to multiple legacy circular chart recorders while providing secure electronic data files. This chart view is configurable for a variety of time formats from 30 minutes to 4-weeks.

Standard version of Firmware

AI: Analog input offers configurable log interval: 100ms, 1, 2, 5, 10, 20, 30 Sec, 1, 2 Min/Dot.

DI: Digital input configurable as normal Logic or high frequency Pulse.

AO: Analog Retransmission Output, mA or VDC.

DO: Digital output/relay output can be enabled. Each DO card has 6 relays.

Display: Configurable display speed: 100ms, 1, 2, 5, 10, 20, 30 Sec/Dot, or 1, 2, 10, 30 Min/Page, 1, 2, 4, 8, 12 Hour/Page, or 1 Day/Page.

Timer: Timer functions include Countdown, Repeat Countdown, Daily, Weekly or Monthly base as well as defining a variety of jobs.

Clock: Configurable Date Style (MM/dd/yy or dd/MM/yy), Daylight Savings as well as Time Synchronize via LAN.

Communication: As standard Web Server and email functions are available via LAN. Alarms/events are configurable to have emails sent upon their activation.

Instrument: Adjustable display brightness, Screen Saver time as well as other settings.

Security: The Normal Security supports one password. With the optional CFR21 High Security system supports up to 30-users, 9 security levels, password aging, operator audit trail and auto logout.

Demo: Enable or disable the demonstration mode.

Printer Auto-output: An automatic output of Historical data, Report data or other preselected data may be sent to a selected printer.

System information: Provides Firmware version number, Internal & External memory status, IP address and IO card status of each Slot.

Field Calibration: Analog channels may be easily field calibrated.

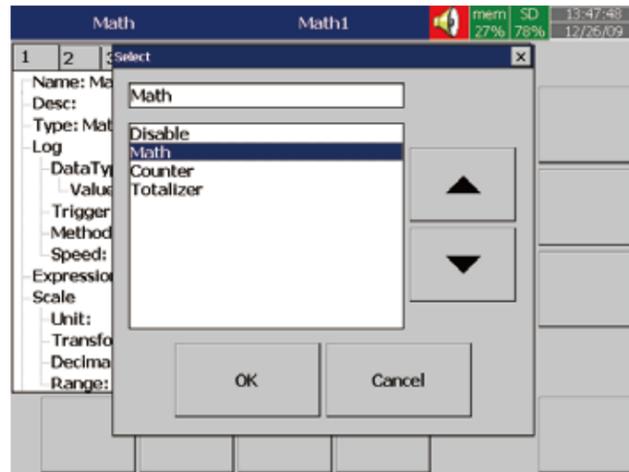

Additional Functions

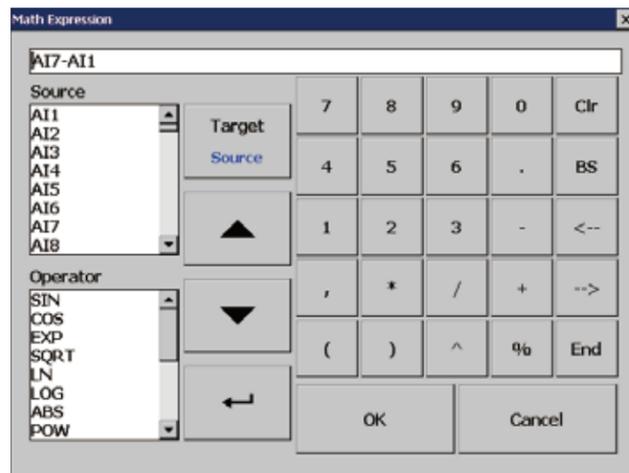

Standard version of Firmware

Standard Firmware version includes Mathematics, Counters & Totalizer

Math: It includes Math, Counter & Totalizer.

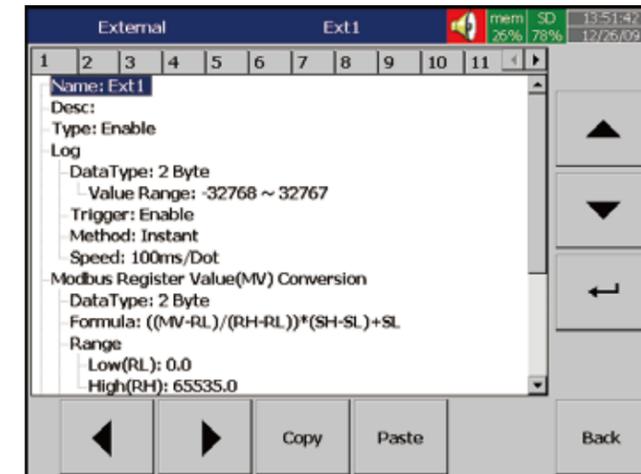

Math Expression is entered directly

Plus version of Firmware

Plus versions of Firmware offer additional features: External Channels, Custom Display, Batch, High Frequency Pulse input and FDA CFR21 part 11.

External Channels: In addition to the AI & DI inputs the PR recorders may accept additional inputs through serial or Ethernet TCP communication referenced as External Channels. The PR10, PR20 & PR30 may accept up to 24, 48 & 96 External Channels respectively.

Custom Edited Display: The Plus Version firmware 2 & 3 includes PC software Panel Studio allowing users to create/edit custom display views that can include animation and then download to PR recorders.

Batch: Data Log files may be created by Batch allowing a custom batch and lot number name for the file, typically desired for food, pharmaceutical processing as well as other applications.

FDA, CFR21 part 11: The CFR21 part 11 feature meets the requirements for U.S. Food and Drug administration.

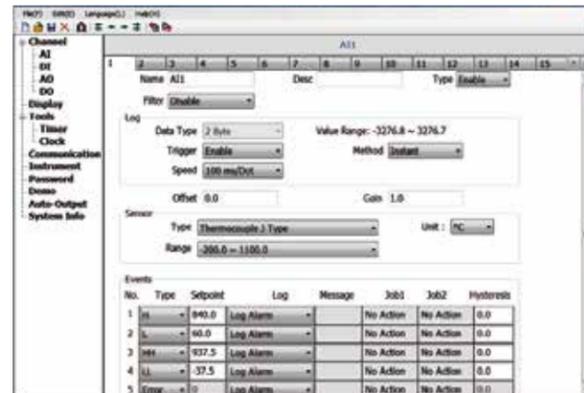

Functions in PC Software

Standard PC Software

The standard software consists of two parts, Configuration and Historical Viewer.

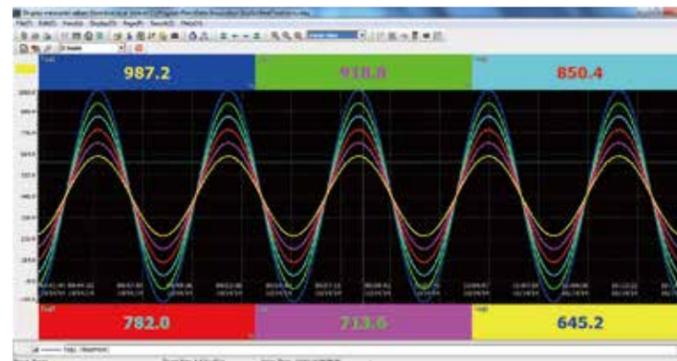

I. Configuration

The PC Software allows an easy method to create, edit and save recorder configuration. Configuration files may be easily imported/exported to PR recorder.

II. Historical Viewer

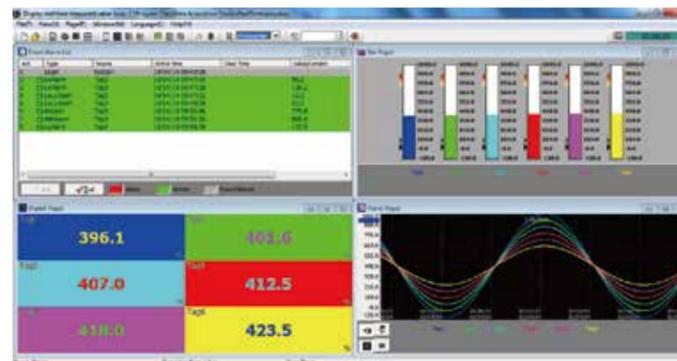

Display, print and export (.csv) historical data, chart trends, alarms and events. Search data by time, time period, tag, alarm, events and operator remarks.

Extensive software Data Acquisition Studio

III. RealTime Viewer

In addition to the Configuration & Historical Viewer, the Data Acquisition Studio software includes RealTime Viewer to provide real-time monitoring of multiple PR recorders via serial or Ethernet TCP as well as offering additional features.

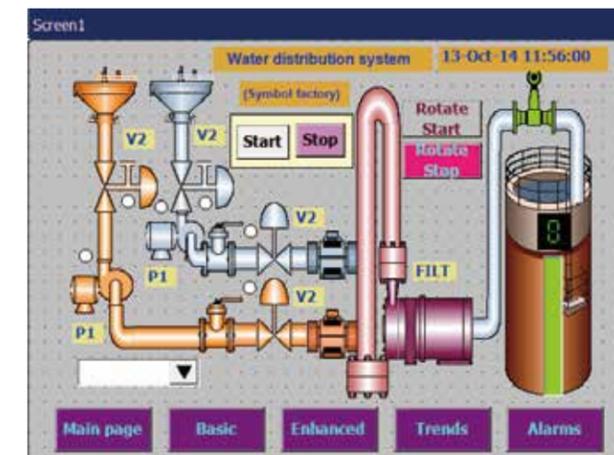

IV. Panel Studio

With Plus version 2 or 3 Firmware, Panel Studio PC software is provided to allow the creation/editing of custom display views that may include animation. When completed on a PC the custom views are downloaded to the recorder. The custom display views are in addition to the standard views.

Edit it on PC

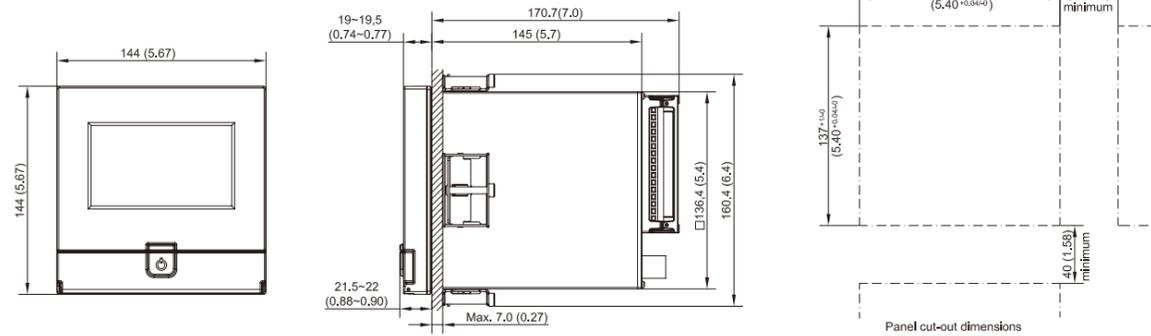

Download it onto recorders

PR10 Ordering Code

PR1003
(3 analog inputs)

Other inputs & outputs*
0: none
6: 3 relays + 3 DI

PR1006
(6 analog inputs)

Other inputs & outputs*
0: none
1: 6 relays
3: 6 DI
6: 3 relays + 3 DI
7: 6 relays + 6 DI

Power

A: 90-250 VAC, 50/60 Hz
D: 11-36 VDC

Communication

0: standard Ethernet
1: Ethernet + RS232
2: Ethernet + RS-422/485

Firmware

0: standard version includes Mathematics, Counter & Totalizer
1: Plus version 1 with external channels, batch & FDA, CFR21 part 11
2: Plus version 2 with custom edited display, an editing software Panel Studio to be supplied
3: Plus version 3 including Plus version 1+2 above

PC software

1: free basic software of Historical Viewer & Configuration
2: extensive software Data Acquisition Studio (RealTime Viewer + Historical Viewer + Configuration)

Mounting types, power cord & switch

0: panel mount, no power cord, no power switch
1: panel mount, no power cord, power switch
2: portable, UL & CSA power cord, power switch
3: portable, VDE power cord, power switch
4: portable, SAA power cord, power switch
5: portable, BS power cord, power switch
6: portable, no power cord, power switch
7: panel mount, UL & CSA power cord, power switch
8: panel mount, VDE power cord, power switch
9: panel mount, SAA power cord, power switch
A: panel mount, BS power cord, power switch

Special options

00: none
S1: 16G SD card
S2: 32G SD card
10: Process control card
11: Process control card + 16G SD card
12: Process control card + 32G SD card

*Notes: DI - digital inputs

Process control card ordering code needs to be chosen after Special options 10, 11, 12 been selected
When Process control card is specified PR10 is not UL, cUL

Process Control card Ordering Code

PC201

Output 1

0: None
1: Relay 2A/240VAC
2: Pulse voltage to drive SSR, 5V/30mA
3: Isolated 4-20mA/0-20mA (OM95-3)
4: Isolated 1-5V/0-5V (OM95-4)
5: Isolated 0-10V (OM95-5)
6: Triac output 1A/240VAC, SSR
C: Pulse voltage to drive SSR, 14V/40mA (OM94-7)

Output 2

0: None
1: Relay 2A/240VAC
2: Pulse voltage to drive SSR, 5V/30mA
3: Isolated 4-20mA/0-20mA (OM95-3)
4: Isolated 1-5V/0-5V (OM95-4)
5: Isolated 0-10V (OM95-5)
6: Triac output 1A/240VAC, SSR
7: Isolated 20VDC/25mA power supply (DC94-1)
8: Isolated 12VDC/40mA power supply (DC94-2)
9: Isolated 5VDC/80mA power supply (DC94-3)
C: Pulse voltage to drive SSR, 14V/40mA (OM94-7)

Alarm 1

0: None
1: Form C relay 2A/240VAC

Alarm 2

0: None
1: Form A relay 2A/240VAC
