To Whom It May Concern,

Sensus has submitted the 496, 143-80, and 243 series regulators with internal relief valves to Underwriters Laboratory (UL) for third part testing, certifying to the ANSI Z21.80 / CSA 6.22 Line Regulator standard. The testing and design review are being processed under UL Project Number 4788503983. The project is expected to be completed in mid-2020.

Models included in Project # 4788503983 are:

- 496 Residential Service Regulator
- 143-80-2 Residential Service Regulator
- 243-8-2 Commercial Service Regulator
- 243-12-2 Commercial Service Regulator
- 243-8-6 Commercial Service Regulator with Low Pressure Cut-Off
- 243-12-6 Commercial Service Regulator with Low Pressure Cut-Off

When the approval is received a Product Information Notice will be issued. If you have any questions regarding the status of this project, please email me at bobbie.mohney@xyleminc.com or you may call me at 814-375-8332.

Regards,

Bobbie Mohney
Product Manager, Diaphragm Meters & Regulators
