

THE BOOKBINDERY

# *Thesis Borders and Decoration*

When you visit The Bookbindery, to have a thesis bound, you are offered quite a few options relating to the decoration of your bound volumes. It is not so easy to see all the options 'online'. So, we have reduced the choices available for our online customers, to three options. If you want something else please contact us to discuss it. We have endeavoured to explain the three options below.

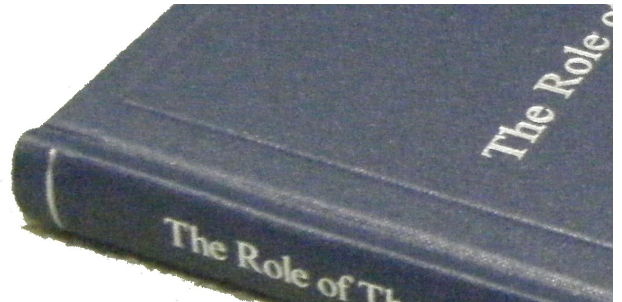

## Standard Options

These are classic thesis choices that most people would be more than happy with.

This includes :

Spine bands (presuming that they will fit nicely). That is lines across the top and bottom of the spine that match the colour of your lettering.

Framing lines. That is impressed lines around the front cover of your thesis which form a frame.

## Gold/Silver Frames

It is important to note with this option that there is an extra cost involved.

Normally this is around \$5 + GST per copy, but this does depend on the number of copies being bound. This is because this option requires more work than the other options.

This option includes spine bands (as in the previous option) and in addition a distinctive frame around the cover in a matching colour to your lettering.

## Completely Plain

No borders or decoration, to the cover or spine, apart from the actual lettering
