

There are many great features in the Smart Solar Garden app that allow you to customize your light(s).

Let's start with the Lights page!

Lights

Group: BACKYARD

Once you've added your lights, they'll appear here. Tap on any light to open the Control Screen for that light. Long press on any light to rename it or forget it from the app.

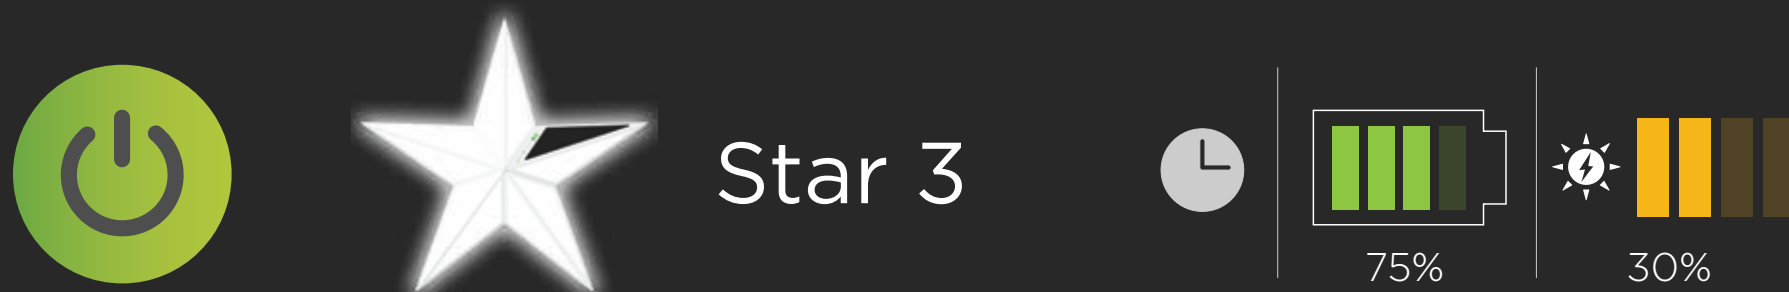

Helpful tip! If you ever have trouble with a light not responding, a good first step is to forget the light and add it again.

Grouped Lights:

Group: **PATIO**

Group: **BACKYARD**

Now we'll move on to the
Groups page!

Lights

Groups

Schedules

Add New Group

Group 1

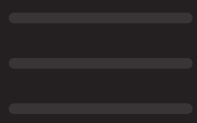

Group 2

Group 3

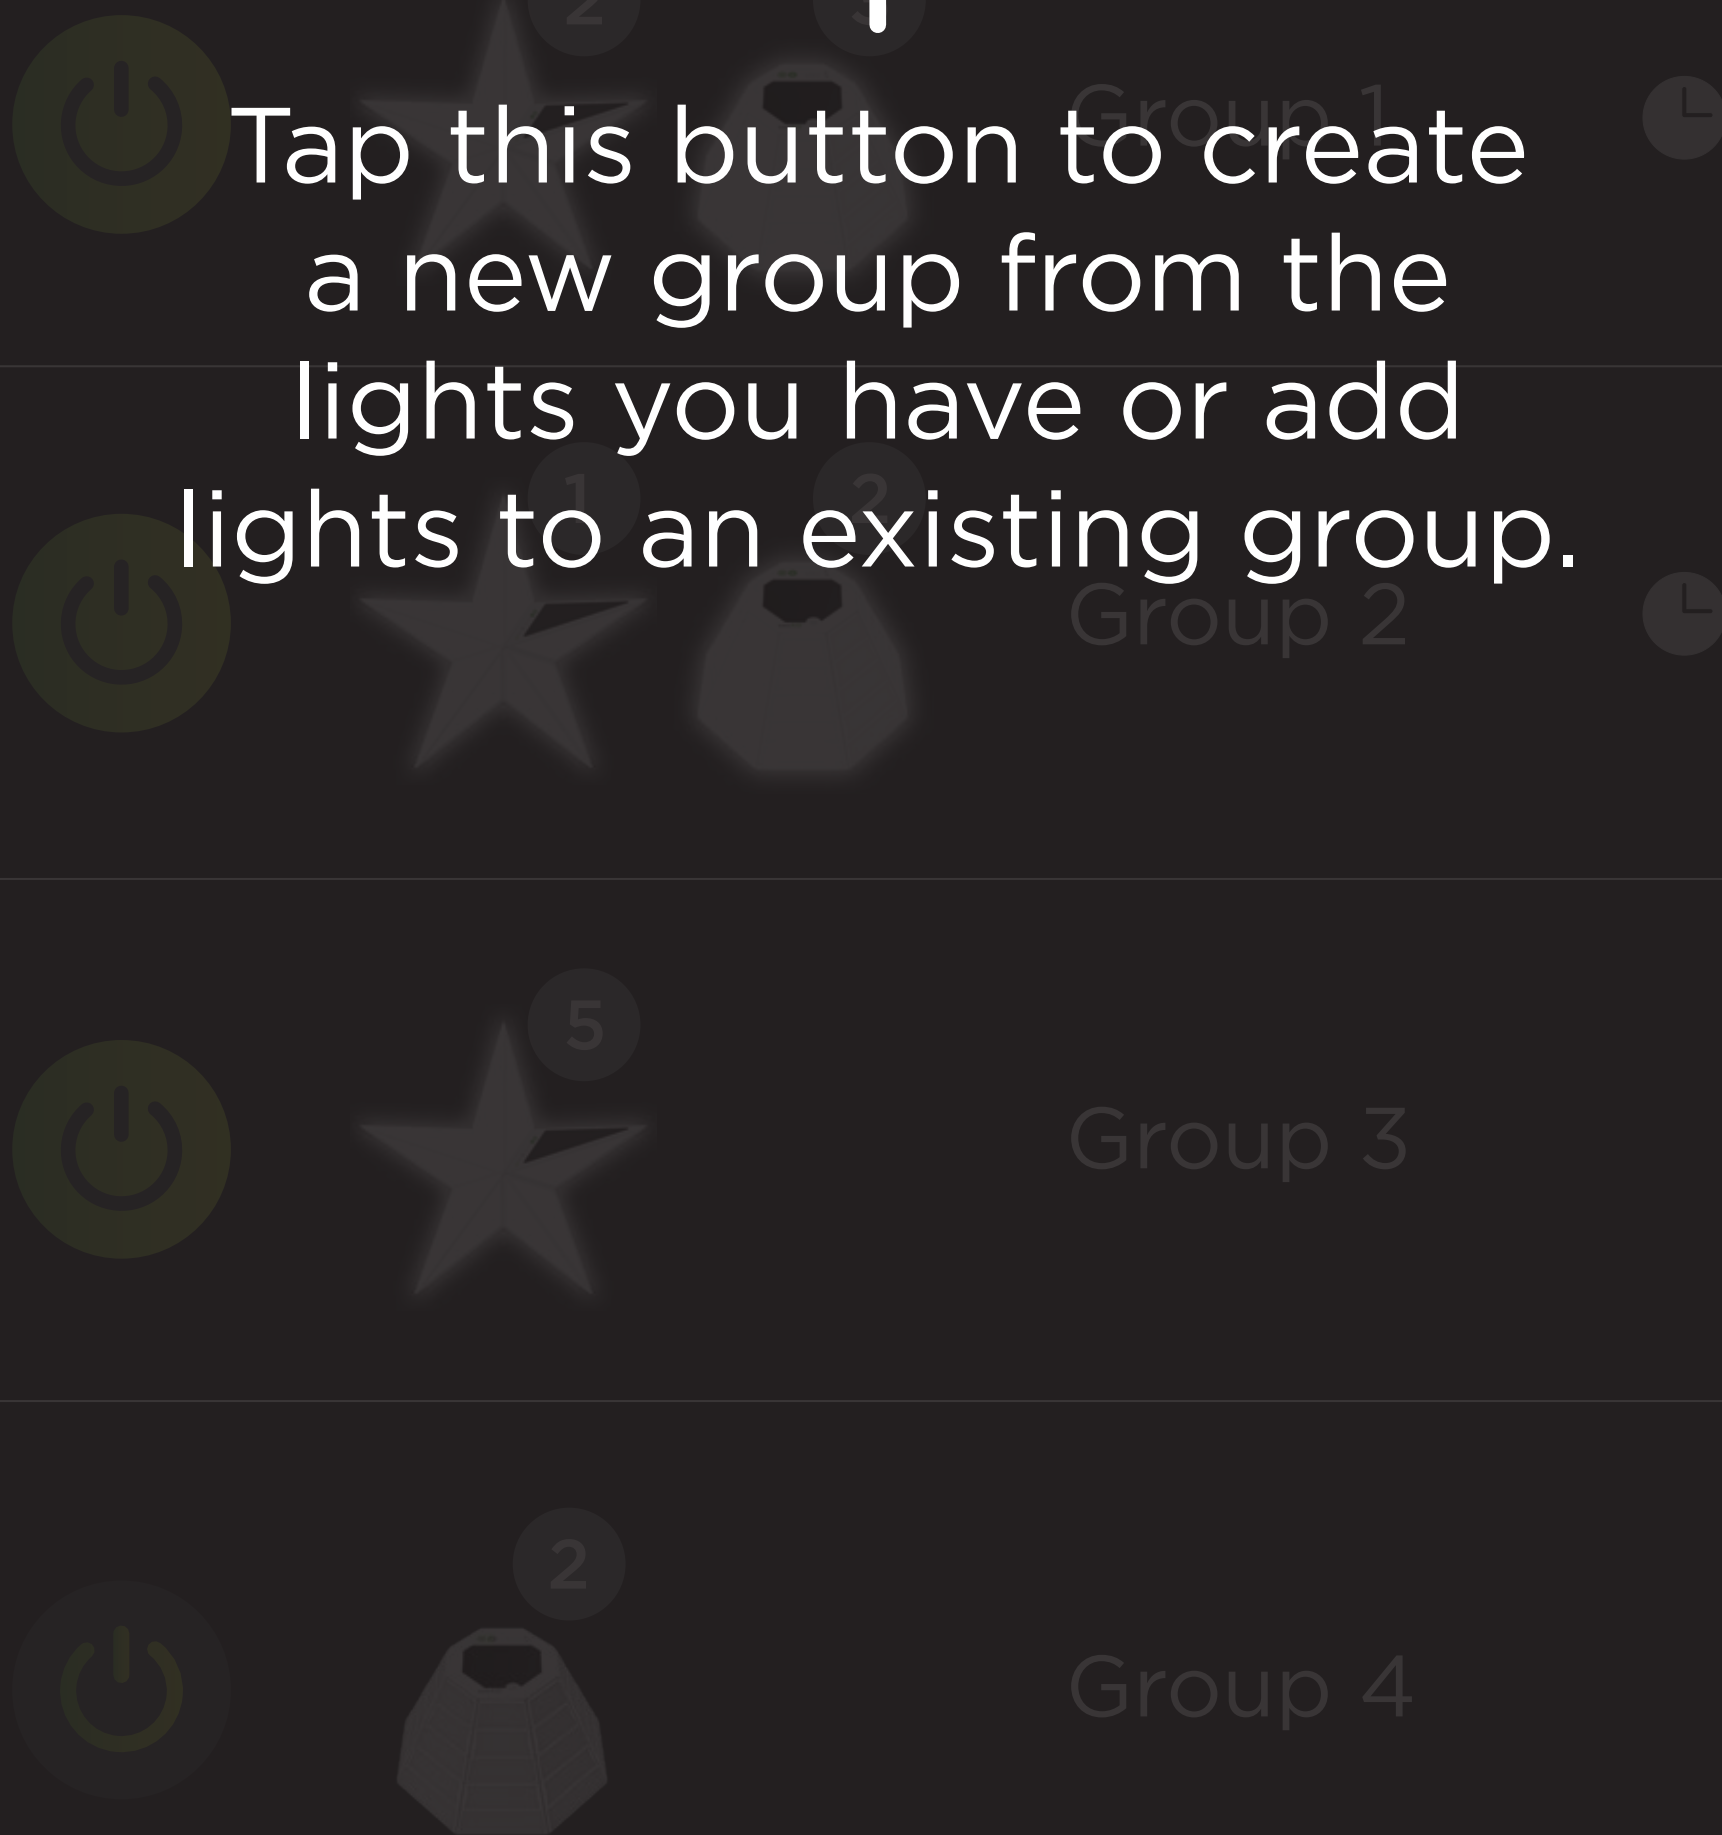

Group 4

Add New Group

Tap this button to create a new group from the lights you have or add lights to an existing group.

Once you've created groups, they'll appear here. Tap any group to open the Control Screen for that group.

Long press on any group to rename it or delete it.

+ Add New Group

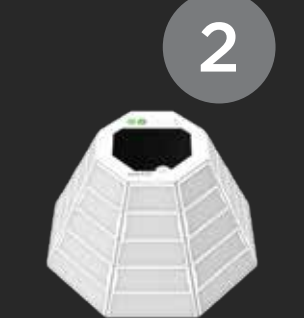

Group 1

Group 2

Group 3

Group 4

Group Name

Control

Saved Colors

Patterns

This is the Control Screen for a group of lights.

Here you can control the entire group the same way you control a single light.

Tap the arrow at the bottom of the screen to open the drawer.

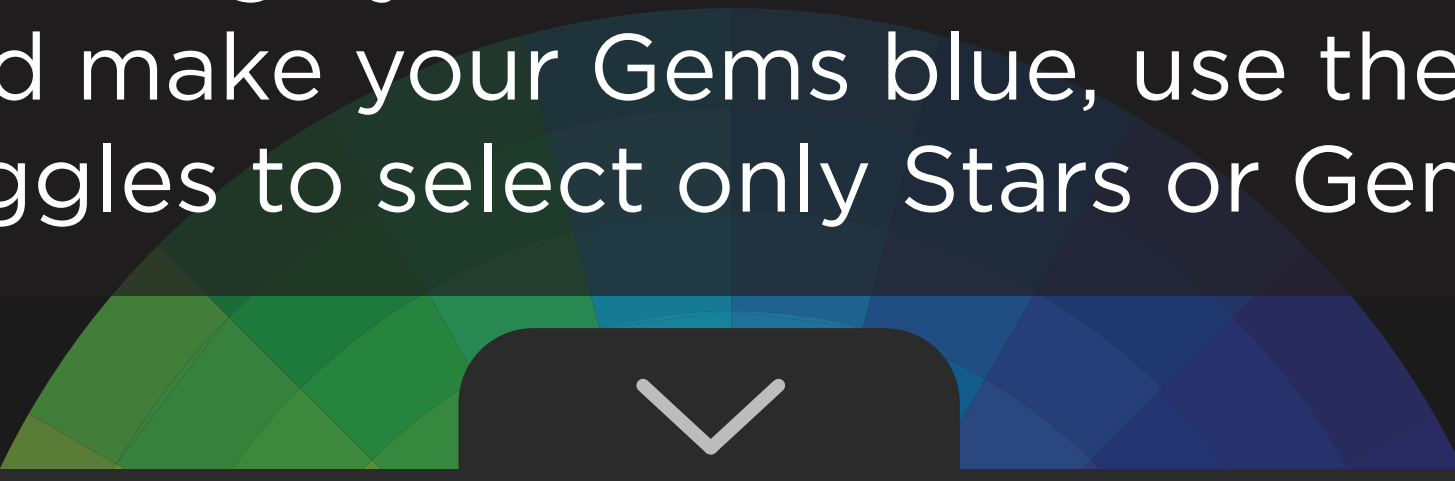

Lights

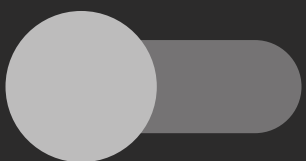

The drawer allows you to control certain lights within the group or edit a group. **Patio**

Helpful tip! Stars only have warm and cool white LEDs, so if you want to change your Stars to warm white, and make your Gems blue, use the toggles to select only Stars or Gems.
