How to Check the Battery Level

- 1) Press the red  Battery Button.
- 2) First, all 4 green LED's will flash once.
- 3) Next, the green LED's will hold steady to show the charge level.

PRO TIP: If the green LED's only flash, and do not hold steady, then your LuminAID is on low battery.

How to Recharge Your Lantern

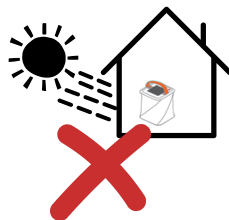

Charging by Solar Power: Charge outdoors in direct sunlight while the lantern is OFF. Your lantern can charge in cloudy weather, but it will take longer.

PRO TIP: When the red  Indicator LED shines brightly, your lantern is getting a strong charge!

Charging by Micro-USB: A small micro-USB to USB-A cable is included for recharging your lantern. USB recharging takes 2-4 hours.

DO charge outdoors
in direct sunlight

DON'T charge indoors
through windows

How to Charge Your Phone

- 1) Plug the small end of your phone's charging cable into your phone. Plug the large end* into the LuminAID's USB-A output port.
- 2) Press the red  Battery Button to send a charge to your phone. For best performance, make sure your LuminAID is charged first.

*If your phone uses a USB-C charging cable, you may need an adapter. We sell one on LuminAID.com

Can my LuminAID charge phones?

Our 2-in-1 Power Lantern models can charge phones.
Here's how to check what type you have:

Micro-USB INPUT Port

This port is for recharging your LuminAID's internal battery by Micro-USB (cable included)

If your LuminAID only has this port, it does NOT charge phones.

Micro-USB Cable

USB/Solar Lantern

2-in-1 Power Lantern

USB-A OUTPUT Port Micro-USB INPUT Port

2-in-1 Power Lantern models have 2 ports:

- 1) USB-A OUTPUT port to charge your phone (use a your phone's charging cable)
- 2) Micro-USB INPUT port for recharging the internal battery (cable included)

USB-A Cable Micro-USB Cable
