

1964-66 Cutlass

Broken T-Handle??

Replace the broken T-Handle with a new White or Black knob.
This is an easy fix with our newly designed made in the USA
adaptor.

The kit includes a SHIFWORKS® designed adaptor that slides over
the factory rod and is held in place by a customer-installed roll pin.
Either a black or white knob is available. Shifter unlocks from park
by pushing ball down.

Broken T

**Install the
Adaptor**

**New Smoothie
Knob**
