### Gift The Gift of Happy Nails with Nail-Aid

[dlindqu5](#) [Leave a comment](#)

I love to do my nails, just like many other women and girls. The part I actually dread is when they start chipping because that means I have to go sit in the bathroom and take them off. I have come across some pretty iffy nail polish removers through my days, some of them smell really bad, some simply just don't work, some of them smear polish all over your fingers and toes and it can be difficult to dump your bottle upside down without getting your cotton ball sopping wet. Nail-Aid has come up with this genius way to remove your polish without the mess and torture of regular polish remover, its the [Nail-Aid Spray Nail Polish Remover!](#)

#### Nail-Aid: 1 Second Spray Away

A maximum strength acetone nail polish remover in an exclusive aerosol spray. 1 Second Spray Away is the fastest and most effective way to remove all types of polish in seconds without the mess.

- Just spray directly & soak cotton ball, then swipe away.
- No polish stains left behind.
- **Hydrates** nails & skin. No dryness, no white residue.
- 100% leak and spill proof. No mess.
- Powerful hyaluronic and collagen formula strengthens splitting, peeling nails.

Nail-Aid also has other amazing products that I personally use all the time, one of my favorites is the [Keratin 3 Day Growth](#) product. I have it on my nails right now and it makes them feel so strong and look super shiny! I feel like using this along with the spray nail polish is going to have my nails looking and feeling a lot healthier.
