Nail-Aid

Nail-Aid's SPRAY AWAY— the first-ever aerosol nail polish remover that provides fast and effortless nail color removal while hydrating nails. Unlike other removers that use water to dilute the harsh effects of acetone, Spray Away uses aerosol technology to marry acetone and other moisturizing ingredients such as keratin and collagen, which would not be possible with any other application (think oil and vinegar). Acetone is long to know to be most effective to remove polish, but now you could use it guilt-free without the repercussions on your nails! Now available exclusively in all 4500+ Walmart stores nationwide.
