Spray Away Spray, Press & Swipe!

Growing up there were several things I did as a child that annoyed the crap out of my mother. One of them being biting my nails! One of the grossest yet common bad habits one could have. She use to tell me that biting my nails would cause the skin to grow up over my nails, thus not allowing my nails to ever grow. I've spent more money on fake nails than I probably care to admit. Changing nail color, design and style can be costly over time. Which is why I wanted an at home manicure option.

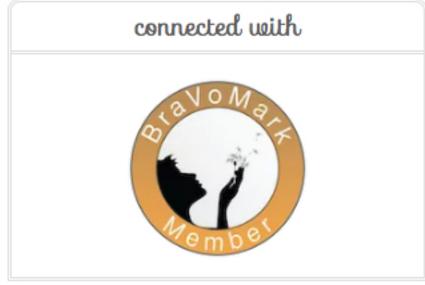

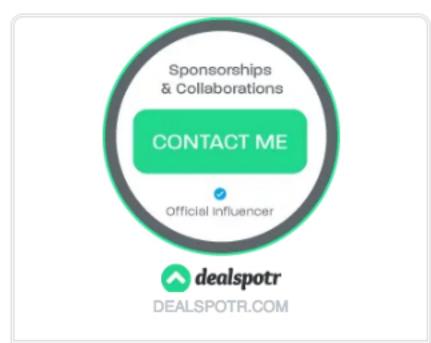

I've not only found a company that can provide fast removal of old nail polish, but away to increase nail growth in just 3 days! Introducing Nail-Aid's SPRAY AWAY! The first-ever aerosol nail polish remover that provides fast and effortless nail color removal while hydrating nails, available exclusively in all 4500+ Walmart stores nationwide.

Unlike other removers that use water to dilute the harsh effects of acetone, Spray

Away uses aerosol technology to marry acetone and other moisturizing ingredients such as keratin and collagen, which would not be possible with any other application (think oil and vinegar). Acetone is long to know to be most effective to remove polish, but now you could use it guilt-free without the repercussions on your nails! Not only is it easy to use and 100% leak and spill proof, Spray Away removes

polish in seconds with a Spray, Press & Swipe. Over All Thoughts: I was really skeptical about this product at first, I didn't really think it would live up

to it's hype. In my honest opinion, I think it's better! Having the ability to spray directly onto the cotton ball, or nail is a great feature. It almost immediately removes even the darkest of nail polish colors! In addition to that I think the price point is perfect. I see myself having to use less of the product because of it's effectiveness. Personally I this nail polish remover less smelly than your average brand. Below you'll see how easy it is to use!

## Aid's Best Seller Keratin 3 Day Growth. Being that I am, and probably will

forever be a nail biter I NEED this product. On the off chance I decide to let my nails grow out, they are brittle, weak and tear. So by enlisting the help of the 3 Day Growth serum I can expect noticeable growth in my nails.

I did try this product out, and applied it every 3 days for a week! I was shocked when I saw how much growth there was to my nails. I totally forgot to take the after picture prior to me... getting my nails done for Halloween! However I promise you, that this is the real deal in nail growth. I also noticed a very large change in the hardness of my nail as well. Either of the above mentioned products would make great stocking stuffers, or additions to gift baskets. I

know I'll be asking the jolly ol' fellow to bring me some this year!
