THE NAIL POLISH REMOVER YOU NEED RIGHT NOW

I like to think of myself as a girly girl. There are those times when laziness jumps in and I can't be bothered with makeup or nail polish. But on those days when I feel especially fancy I like to paint my nails a different color every few days. However, this can be a hassle at times with traditional nail polish remover. It dries out your nails and don't even get me started on spills. But, ladies rejoice because nail-aid® has introduced 1 second spray away acetone nail polish remover!

This is super cool in the nail world because you no longer have to worry about spilled bottles of acetone that wreak havoc on sheets and tables. Also, since this nail polish remover is jacked up with extra ingredients like Hyaluronic acid and collagen, it is better for your nails. Available in two acetone sprays and one non-acetone spray, there is a product for everyone.

Nail-aid® Spray Away® Benefits:

- 100% leak & spill proof
- 2X Faster removal
- Non-drying formula
- No yucky white residue
- Made in the USA
- Not tested on animals

Curious how this works? Check out the quick video below:

I've been in love with this product and I think nail-aid® a million times for sending this to me for review purposes. I honestly have no con's to this product. It is exactly what I have been looking for. Nail-aid® also has other cool products I hope to try like their Magic Callus Remover, which allows you to get salon quality results at home. Hello soft feet!

Purchase the nail-aid® Spray Away® nail polish remover for \$8.00 online. Or, purchase at your local drug store!

So tell me, would you try this new nail polish remover?
