

Pickleball Players

SCOUT

- USAPA Approved
- Made in the USA
- 7.7oz (7.5-8.0oz)
- 4¹/₈" Grip Circumference
- 4³/₄" Grip Length
- 15⁷/₈" x 8"
- Aramid Core
- Carbon Fiber Skin

The Scout is an affordable paddle for those looking for lots of power and pop in a lightweight and easy-to-manuever traditional quad shape. Using the same unidirectional carbon fiber face, Winn Dry-Tac grip, and patent-pending contoured edge guard as its sibling, the Rogue, the Scout is packed with features and top-quality materials and components rarely found at the sub \$60 price.

TMD - Targeted Mass Distribution

The Players Pickleball Patent Pending Contoured Edge Guard is a completely unique feature that can't be found anywhere else.

It's thicker on the corners where additional impact protection is needed and thinner everywhere else.

In other words, it's got mass where you need it and not where you don't, for maximum performance and durability.

Players Pickleball was founded in Bellingham, Washington, just a short drive from the birthplace of the sport. We develop high-performance pickleball paddles through a rigorous R&D program that combines a scientific approach with subjective feedback from players to create some of the best paddles money can buy. All of our paddles are made in the USA and are USAPA-approved.
