

MICRO~ FIBRE

TOWEL

GENTLE DRY CARESS

\$18.00

The VERNON FRANÇOIS® white microfiber towel, measuring 70cm x 140cm, dries hair quicker and more gently than a traditional cotton towel. Encourages a frizz-free finish, which all types of curly hair will love. Made from ultra-absorbent fibres that are a narrower width than cotton (hence the 'micro' fibre). This material's lower tendency for creating friction reduces the likelihood of any pulling, stress and damage to the hair's shaft during the drying process. All in all, this is an absolute 'must-have' for fragile and damaged hair, that will benefit all, particularly delicate kinky and coily, hair types too.

"Teasing roots with a comb is an effective way to create instant volume. Shake it out afterwards for a natural finish."
