# FOOT RULER

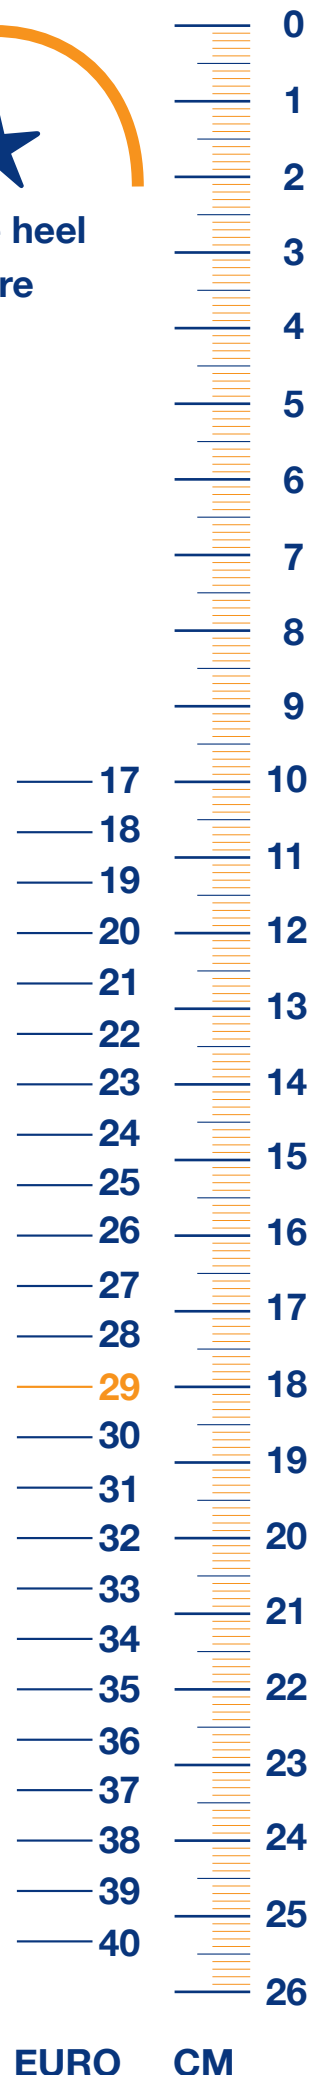

## Instructions to using the LBF Foot Ruler

- 1** Print this page out making sure that you do not select the 'fit to page' option. Ensure page scaling is set to 'none'.
- 2** Place sizing chart on hard flat surface
- 3** Have your child stand flat (feet side by side, hip width apart) placing their heel on the 'star' in the semi-circle.
- 4** Ensure the back of the heel sits flush with the semi-circle
- 5** Measure both feet and record the size at the end of the longest toe
- 6** Use the longest measurement when selecting your shoes. For example, if your child measures 28.5 you should select a size 29 shoe.

- ★ The Foot Ruler is to be used as a guide only. It does not account for variances in foot types, brands and styles.
- ★ Variations of sizing can also occur between different styles produced by the same manufacturer.
- ★ Check the CM of this ruler against a standard ruler to ensure the printing has not distorted the sizing.

Eg. you  
should order  
a size 29 if  
your toe  
comes to
