The Material Container (PMC) is most commonly used for transporting loose material such as demolition debris, waste items, flowable material, etc. The solid sheet metal construction makes it light weight and easy to handle while keeping small items in the container. **This accessory is for material use only.**

Products manufactured by Hi-Tech Hoist LLC. are for material use only. Never use the products to move people; never operate the units over people. It is the responsibility of the owner to install and operate the equipment to all applicable federal, state, and local codes. Specifications subject to change without notice
