PRODUPLICATOR

CD DVD BD Duplicator
Daisy Chain

User Guide
V5.40

Content Index

1. Features

- No PC needed. Independent SATA to SATA DVD / Blu-ray Disc Duplication.
- Sepcial Ssynchronous Load and Copy technology. When the system was installed with HDD, the system will load master source disc to HDD while copying disc to disc. In 2nd run copy, the system will automatically copy from HDD instead of from the source reader.
- Support high speed 20× DVD, 52× CD, 8× Blu-ray burning.
- High compatibility with variety brands of burner.
- Easy assembly SATA port arrangement.
- Support Lightscribe printing.

Chapter 2. Function Table

| Function	Sub-function		Description
1. Copy			To copy disc to disc or copy disc from HDD.
2. Test			To simulate copy process.
3. Compare			To bit by bit compare between source disc and copied discs
4. Copy & Compare			To copy first and compare the copied discs later. To ensure data correctness.
5. Set Burn Speed			To set burning speed for duplication.
6. Select Source			To select source from any optical drive or hard disk drive.
7. Utility	1. Information	1. Disc Info.	To check the format of disc, burning speed supported and total capacity or data size.
		2. Drive Info.	To check the version, model No. and brand name.
		3. System Info.	To check the model No. and firmware version.
	2. Erase Disc	1. Quick Erase	To quick erase data from rewritable disc.
		2. Full Erase	To full erase data from rewritable disc.
	3. PreScan Source		To check source disc's readability.
	4. Track Edit	1. Copy Track	To select and combine audio tracks from various CDs into a single customized audio CD.
		2. Close Disc	To close the disc after track copying to make the CD playable on CD player.
		3. Disc Info.	To check the audio CD's status of usage.
	5. Eject All Disc		To eject all trays.
	6. Copy Counter	1. Show Count	To check how many discs copy successfully and failed.
		2. Enable Counter	To enable or disable counter setting.
		3. Clear Counter	To delete the record.
	7. Update BIOS		To update the system's firmware.
	8. PRINT LS Label		To print Lightscribe image.

|			
8. Setup	1. Auto Start Time		Allow the system to do the Copy, Test, Compare and Copy + Compare functions automatically.
	2. Display Mode	1. Basic	
		2. Show Timer	
		3. Show Speed	
	3. Button Beep		
	4. Eject On Start	1. Eject All Discs	To eject all trays with disc inside once the system is booted up.
		2. Do Not Eject	No eject any tray or disc once the system is booted up.
		3. Eject Target Only	Only eject target trays with disc inside once the system is booted up.
		4. Eject Source Only	Only eject source disc once the system is booted up.
		5. Eject All Trays	To eject all trays once the system is booted up.
	5. Reader Speed		To adjust the reading speed of source drive.
	6. Compare Speed		To adjust the speed of drives while comparing.
	7. Language		
	8. Clear Setup		To reset all the function back to manufacturer's default setting.
	8. Clear Setup	1. Power On Time	To set a warm-up time from 5 seconds to 99 seconds
		2. Startup Menu	To select which function you would like to show up in the beginning.
		3. Skip Reader Error	To set skip the read error and keep copying.
		4. Change Bad Master	To make the system eject source disc and ask for another one while the source disc is unreadable for system.
		5. CD Overburn	Set to copy overburn CD.
		6. Show HDD Image Name	To show HDD image name or capacity on Copy, Test, Copy + Compare and Compare function.
		7. Keep Buffer	To set enable or disable load source to the buffer.
		8. Boot Password	To enable or disable the user administrative password.
		9. Setup Password	To set up the login password.
		10. Count Password	To set password for function "7.6 Copy Counter".
		11. Eject Tray if no disc	To set if users would like to eject trays when no disc is inserted.
9. HDD Manager	1. Select Image		To select image file from HDD as your source for copy.
	2. Disc=> Image		To load your source disc to the built-in HDD.
	3. Set Reader Speed		To adjust the speed of source reader while you load image file from the reader to HDD.
	4. Show Image Info.		To check the disc format and data size of image file.
	5. Rename Image		To change the name of image file.
	6. Delete Image		To delete image file in the built-in HDD.
	7. Show HDD Info.		To check the information of the built-in HDD includes how many discs are stored and the free space is available.
	8. Format HDD		To format the built-in HDD.
	9. Load & Copy	1. Load First	To load the source to HDD and make copy at the same time.
		2. Synchronous	To load source to HDD first and copy from HDD to disc.
		3. OFF	To disable Load & Copy function.

Chapter 3. Function Operation

1. Copy

It is important to make sure that your source disc is placed in the right drive. You can check or select your source reader by 6.Select Source. (plase refer to 6.Select Source, page 11)

1 Select 1.Copy and place source disc and blank discs into the proper trays. Then the system will detect the source disc and show the information.

```
1.Copy x 3 ──────────── Q'ty of target disc
Source:DVD4462M ──────── Data size
```

2 Press (OK) to start copy.

```
                Q'ty of target
                      |
                   Copy   x3   4462M ──── Data size
Speed of burning ─ 10.0x   3%   163M ──── Copied data size
                      |
                Copy process %
```

3 Once the copy task is finished, the copied discs will be ejected and the result of copy task will show on the LCD:

```
Copy 02:48 ──────────── Elapsed time
 PASS 3  FAIL 0
```
> ⓘ **NOTE** :
> Due to default setting of auto start time, the duplicator will start to copy automatically within a few seconds. You can set "OFF" to close the auto start function or set a longer waiting time. The default setting is 5 seconds.
> (About this setting please refer to 8-1. Auto Start Time, page 17)

If HDD is selected to be the source reader, you have to upload the source to the built-in HDD and then follow copy process to do your copy task. How to upload data from disc to HDD please refer to 9-2.Disc to Image, page 20.

> ⓘ **NOTE** :
> The default setting of source reader is the first drive.

Chapter 3. Function Operation

2. Test

This function will simulate the copy process to ensure error free duplication. During the simulation, it will be nothing left in the recordable discs.

1 Using ⬆/⬇ to select <u>2.Test</u> and press .

```
2.Test x 3
Source:DVD4462M
```

2 Press (ok) to start test

```
Test  x3    4462M
10.0x 50%    163M
```

3 Once the test task is finished, the discs will be ejected and the result of the pass and fail discs for the test task will show on the LCD:

```
TEST 02:48
 PASS 3  FAIL 0
```

> **(i) NOTE** :
> ❶ This function is unable to support DVD+R blank disc.
> ❷ If you use CD/DVD rewritable discs as your blank media in the simulation, all the content inside the discs will be erased permanently during test simulation.

3. Compare

This function will do bit-by-bit comparison between source disc and copied discs to ensure the copied discs are identical to source disc.

1 Place source disc and blank discs into Reader and Writer separately.

2 Using ⬆/⬇ to select <u>3.Compare</u> and press (ok) to start compare.

Chapter 3. Function Operation

```
3.Compare × 3
Source:DVD4462M
```

3 The system will detect the source and target discs automatically.

```
Compare×3  4462M
0.0×  50%  08:12
```

4 After detecting, the system will start to compare.

5 When the comparison has finished, the system will show the compare result.

```
Compare
   Finished !
```

```
Compare    05:06
PASS 3    FAIL 0
```

4. Copy + Compare

This function will to do copy task first and execute comparison automatically when copy process has been finished.

> **NOTE** :
> In Copy, Test, Compare and Copy+Compare functions
> ❶ If there is no source and target discs inside the duplicator, there will be nothing show on LCD.
>
> ```
> 1.Copy
> Source:No
> ```
>
> ❷ If the built-in HDD is selected as source, the information presents differen.
>
> ❸ The information display of these 4 functions will be different based on thedisplay mode you selected.(Plase refer to 8-2.Display mode, page 17)
>
> ```
> 1.Copy × 3
> Source:H(A001) ──── Image file name
> ```

5. Set Burn Speed

You can adjust the burning speed of CD/Audio CD/DVD/DVD DL/Blu-ray by this setting. The default setting of CD is 40×, Audio CD 24×, DVD 8×, DVD DL 2× and Blu-ray 2×.

1 Using ⬆/⬇ to select 5.Set Burn Speed and press 🆗.

```
5.Set Burn Speed
```

2 Pressing ⬆/⬇ to adjust the burning speed of CD and press 🆗 to confirm it, or press to select Audio CD,DVD, DVD DL or Blu-ray to adjust the burning speed.

```
[Burn Speed]
        CD = 40
```

6. Select Source

You can set any drive or built-in HDD in the duplicator to be your source reader.

1 Using ⬆/⬇ to select 6.Select Source.

```
6.Select Source
```

2 Press to check the current source reader, or select the proper drive to be the source reader by pressing ⬆/⬇, once the source reader is selected, press to confirm the setting and back to the menu list.

```
Source: [D#01]
    ===> [D#01]
```

NOTE :
The default setting of source reader is the first drive.

Chapter 3. Function Operation

7. Utility

7-1. Information

You can check the information of disc, drive and system by this function. By pressing ▲/▼, each disc or drive's information will show on the LCD.

1 Using ▲/▼ to select 7.Utility, press ⊙ to enter the sub menu. Then, select 1.Information and press ⊙.

```
7.Utility
```

```
[Utility]
1.Information
```

2 Using ▲/▼ to select 1.Disc Info. or 2.Drive Info. or 3.System Info., and press ⊙ to see the related information.

3 The information will show on the LCD as below:
- Disc Info. : You can check the format of disc, burning speed supported and total capacity. If the disc has data inside, you also can check the size of data.

```
[5]18,16,12,8,6      ——— Burning Speed
DVD-RW      4489M     ——— Capacity/Data size
```
Disc Format

- Drive Info. :
  ❶ HDD:you can press the button ▲,to check your HDD Brand&Model name.

```
[HDD]P01.0  CC2H
ST3166813AS
```

  ❷ Drive:The version,model No.and brand name can be checked here.

```
[#]Port 2.0 1.03     ——— Drive version
Pionner DVD RW       ——— Brand name
```

- System Info. : The model No. and firmware version can be checked here.

```
P507
V2.25.2      128MB
```

7-2. Erase Disc

This function will erase the rewritable discs in WRITER tray, there are two erase modes available:

- Quick Erase : It will erase the INDEX of the rewritable disc.
- Full Erase : It will erase ALL DATA in the rewritable disc, which takes longer time than Quick Erase.

1 Place discs into writers.

2 Using (▲)/(▼) to select 7.Utility and press (ok) to enter the sub menu. Then, select 2.Erase and press (ok).

```
7.Utility
```

```
[Utility]
2.Erase
```

3 Using (▲)/(▼) to select 1.Quick Erase. or 2.Full Erase.

```
[Erase Disc]
1.Quick Erase
```
OR
```
[Erase Disc]
2.Full Erase
```

4 Pressing (ok) to execute the erasing task. When the system is detecting the discs, you will see the colon flashing.

The Second Drive ——
```
Quick Erase Disc
_ : _____
```

5 When the erase job is in process, you should see the O and o are blinking by turns.

Chapter 3. Function Operation

```
Quick Erase Disc
_ O _____
```

6 Once the erase task has finished, the O stop blinking, the disc will be ejected automatically.

```
Quick Erase Disc
_____
```

> **NOTE** :
> ❶ If you see F and f are blinking by turns, which means the whole new DVD+RW is in format process.
> ❷ Erase function only support rewritable discs.

7-3. PreScan Source

This function will scan and detect any bad sectors existing in the source disc, which helps you to ensure the readability of source disc.

1 Place a source disc into reader.

2 Using ▲/▼ to select 7.Utility and press (ok) to enter the sub menu. Then, select 3.Prescan Source and press (ok) to start scan task.

```
[Utility]
3.Prescan Source
```

3 When prescan task is in process, you can see the process on the display :

```
PreScan      4462M  ──── Data size
0:50  30% 1300M  ──── Scanned data size
```
Elapsed time ────┘   └──── Scan process %

4 When the prescan task has finished, the result of prescan will be shown on the LCD.

```
PreScan    4462M
       PASS !
```

7-4. Track Edit

This function enables you to combine audio tracks from various CDs into a single customize audio CD.

• Copy Track: You can select and combine audio tracks from different CDs in this section.

• Close Disc: You have to perform this function after copy track to make the CD playable on CD player.

• Disc Info.: You can check the audio CD's status of usage.

7-5. Eject All Disc

You can eject all discs including source and target discs at the same time by this function.

7-6. Copy Counter

This function will record the result of duplication.

• Show Count: You can check how many discs copy successful and failed.

• Enable Counter: You can set the counter enable or disable to record the copy result.

• Clear Counter: You can delete the record by this function.

1 Using ▲/▼ to select 7.Utility and press (ok) to enter the sub menu. Then, select 6.Copy Counter and press (ok).

```
[Utility]
6.Copy counter
```

2 Using ▲/▼ to select 1.Show Count.

```
[Copy count]
1.Show Count
```

3 Pressing to check the calculation of successful and failed duplication for CD and DVD.

Chapter 3. Function Operation

Q'ty of passed CD

```
┌─────────────────────┐
│ CD      P6      F0   │ ── Q'ty of failed CD
│ DVD     P12     P0   │
└─────────────────────┘
```

7-7. Update BIOS

You can update the system's firmware in this function.

1 Place manufacturer certified update file CD into any drive.

2 Pressing ⬆/⬇ to select 7.Utility and sub menu 7.Update BIOS and then press (ok) to start the process.

```
┌─────────────────────┐
│ [Utility]           │
│ 7.Update BIOS       │
└─────────────────────┘
```

3 The system will detect the update file and execute update task automatically.

```
┌─────────────────────┐
│ Update Firmware     │
│              20%    │
└─────────────────────┘
```

4 Once the update job has done, the system will require you to reboot the system.

```
┌─────────────────────┐
│ TURN OFF, WAIT 5    │
│ Second, TURN ON     │
└─────────────────────┘
```

> **(i) NOTE** :
> Do NOT save the firmware in a folder. The system can not detect the file if you save it ina folder.

7-8. PRINT LS Label

This function will let you using the Lightscribe technology to print your own image on discs.
The operation process please refer to Appendix Lightscribe Operation.

8. Setup

8-1. Auto Start Time

This setting will allow the system to do the Copy, Test, Compare and Copy + Compare functions automatically in a few seconds once the source and blank discs are placed in the trays and detected by the system. The default setting is 5 seconds. You can set a longer/shorter time from 1 to 99 seconds or set OFF to disable this function and execute copy task by manual.

1 Pressing (▲)/(▼) to select 8.Setup and sub menu 1.Auto Start Time.

```
[Setup]
1.Auto StartTime
```

2 Pressing (▲)/(▼) to set the time.

```
[Auto StartTime]
        5 seconds
```

8-2. Display Mode

You can select the prefered display mode in Copy, Test, Compare, Copy+Compare.

• Basic : It will only show the copy process (%) on LCD.

Q'ty of target

```
1.Copy x5    900M
        77%  693M
```

Copy process % ———
Data size
Copied size

• Show Timer : It will show the time for copy.

```
1.Copy x5    900M
0:41  77%   693M
```

Elapsed time ———

• Show Speed : It will show the speed of burning during copy process.

Chapter 3. Function Operation

```
1.Copy x5    900M
16x    77%   693M
```

Speed of burning

8-3. Button Beep
This setting will allow you to set up to hear a beep when a button is pressed or not.

8-4. Eject On Start
You can make the trays or discs eject once the system is booted up.
- Eject All Discs : To eject all trays with disc inside once the system is booted up.
- Do Not Eject : No eject any tray or disc once the system is booted up.
- Eject Target Only : Only eject target trays with disc inside once the system is booted up.
- Eject Source Only : Only eject source disc once the system is booted up.
- Eject All Trays : To eject all trays once the system is booted up.

8-5. Reader Speed
This setting allows you to adjust the reading speed of source drive. The default setting of reader speed of CD is 40×; DVD is 24×.

8-6. Compare Speed
The reading speed of drive and disc are the reasons can affect the quality of comparison. This setting allows you to adjust the reading speed of drives to match up the reading speed of discs. The default setting of CD's compare speed is 40×, DVD is 8×.

8-7. Language
You can set a proper language for interface during operation.

8-8. Clear Setup
This setting will reset all the function back to manufacturer's default setting.

8-9. Advanced Setup
- Power On Time : You can set a warm-up time from 5 to 99 seconds for warming up the duplicator when it is turned on. The default setting is 10 seconds.

Chapter 3. Function Operation

- Start-up Menu : You can select which function you would like to show up in the beginning.
- Skip Read Error : You can set this function enable to skip disc errors in order to avoid bad quality of copy. If you are confident of your source disc has only a small and insignificant error due to physical damages and can be overlooked, you can set NO to disable this function.

> **(i) NOTE** :
> Skip Read Error can not fix the error in the source disc, all it does is skipping the errors and keeps copying the rest of readable data.

- Change Bad Master : This setting will make the system eject source disc and ask for another one while the source disc is unreadable for system.
- CD Overburn : The majority of discs have a small margin of extra groove at the outer edge. This setting allows you to copy data over the normal size limit.
- Show HDD Image Name : You can select to show HDD image name or capacity on Copy, Test, Copy + Compare and Compare function.

Show HDD Image Name:

```
1.Copy
Source:H(A001)
```

Show capacity:

```
1.Copy
Source:H(CD702)
```

> **(i) NOTE** :
> When you change the source from drive to HDD, the LCD will show the HDD information. How to change your source reader please refer to 6.Select Source, page ??.

- Keep Buffer : You can set Yes to load source disc to buffer in first round of Copy, Test, Compare or Copy+Compare, and do it again without the source disc. Or you can set No to keep buffer not be used.

> **(i) NOTE** :
> The source will be only temporary saved in buffer, there will be nothing left when you exit the task (Copy, Test, Compare and Copy+Compare or reboot the system.

- Boot Password : This setting allows you to enable or disable the user administrative password. Users have to login when the system is booted on.
- Setup Password : You can set up password by pressing (▲)/(▼) to select the number you like and press (ok) to set next number.
- Count Password : To set password for function 7-6 Copy Counter.
- Eject Tray if no disc : To set if users would like to eject tray when no disc is inserted.

Chapter 3. Function Operation

9. HDD Manager (For HDD-installed duplicator)

9-1. Select Image

You can select image file from HDD as your source for copy. When this function is selected, the system will set the HDD to be the source reader automatically.

1 Pressing (▲)/(▼) to select 9.HDD Manager and sub menu 1.Select Image.

```
[HDD Manager]
1.Select Image
```

2 Pressing (▲)/(▼) to select the image you need and press (ok) to confirm.

```
001[A001]
Auido CD    702M
```
— Data size

9-2. Disc to Image

This function will load your source disc to the built-in HDD and save the source as an image file.

1 Placing the source disc to any one of the drives.

2 Pressing (▲)/(▼) to select 9.HDD Manager and sub menu 2.Disc to Image.

```
[HDD Manager]
1.CD => Image
```

3 Pressing (ok) to start loading.

```
DVD===>[A001]
 50%       456MB
```

4 When loading has finished, the disc will be ejected automatically.

```
DVD===>[A001]
    Finished !
```

> (i) **NOTE** :
> The source will be only temporary saved in buffer, there will be nothing left when you exit the task (Copy, Test, Compare and Copy+Compare or reboot the system.

9-3. Set Reader Speed

You can adjust the reading speed of the drive which you put the source disc. This function is ONLY available when you loading the source disc to HDD. The default setting of both CD and DVD speed are MAX.

9-4. Show Image Info.

You can check the disc format and data size of image file in this function.

1 Pressing (▲)/(▼) to select 9.HDD Manager and sub menu 4.Show Image Info.

```
[HDD Manager]
4.ShowImageInfo.
```

2 Press (OK) to check the disc format and data size of the image file. And you can press (▲)/(▼) to check other image file's information.

```
001 [A001]
AudioCD    702M
```

9-5. Rename Image

This function allows you to change the name of image file. You can set maximum up to 8 characters for a new name, and NO blank is allowed between the characters.

1 Pressing (▲)/(▼) to select 9.HDD Manager and sub menu 5.Rename Image.

Chapter 3. Function Operation

```
[HDD Manager]
5.Rename Image
```

2 Pressing ⊙ and select which image file you would like to rename by pressing ▲/▼, and then press ⊙ to start edit a new name for the selected file.

```
Edit Image Name
[A002]
```

You can select characters or number by pressing ▲/▼, and press ⊙ to the next space to edit. The maximum is 8 characters without blank space. When it has done, press ⊙ to confirm the new name.

9-6. Delete Image
You can delete image file from the built-in HDD, but the source image file is unable to delete if the file is selected as source. Therefore, before you delete an image file, please check if it is selected as a source and change a new one source by <u>9-1Select Image</u>, page 20.

> ⓘ **NOTE** :
> If there is an image file is deleted, the file name will be held for next new image file, the existing file will not to fill the vacancy. For example, there are 5 image files (A001~A005) in the HDD, when you delete A003, A004 will not change to be A003, once a new file has loaded, its default name will be A003.

9-7. Show HDD Info.
You can check the information of the built-in HDD includes how many discs are stored and the free space is available in the HDD.

```
Used:  1CD   3DVD
Free:146CD 29DVD
```

9-8. Format HDD
This function allows you to format the built-in HDD while the HDD is NOT selected as reading source. You can change the source from HDD to other drive in <u>6.Select Source</u>, page 11.

Chapter 3. Function Operation

Due to the capacity for discs loading is hard to predict precisely and more and more different discs coming out. The traditional method of format is not ideal for using on this duplicator. This duplicator is able to detect disc capacity and assign a proper partition for the disc's data automatically. You do not have to predict and select CD or DVD partition in the beginning and you can check how many discs you can upload from 9-7.Show HDD Info., page 22 This intelligent HDD management technology is much easier for HDD management than the old way.

9-9. Load & Copy

This function is for the system to load the source to HDD and make copy synchronously. The system will load the source to HDD during the first round of duplication, and the HDD will replace the reader drive to be the source in second round of duplication. This special function is very convenient for a big copy task. You also can set:

• Load First : The system will load source to HDD first and take HDD as source to copy.

• Synchronous : The system will load the source to HDD and make copy at the same time.

• OFF : To disable Load & Copy function.

> **NOTE** :
> ❶ The image file will only be saved temporary if it is loaded to HDD by Load & Copy function.
> ❷ If you would like to save the file permanently please load the file to HDD by manual.
>   (refer to 9-2.Disc to image, page 20)

Chapter 4. Specification

Model		P501D	P504D	P507U/W	P511U/W	P515X
Target		1	4	7	11	15
Buffer (DDR2)		64MB		128MB(U) / 512MB(W)		256MB
Interface		SATA				
CD Speed		52X				
DVD Speed		20X				
Blu-ray Speed		8X				
Writing Method		DAO, TAO, RAW
