

SWELL WAKESURF™

Create the Perfect Everlasting Wave

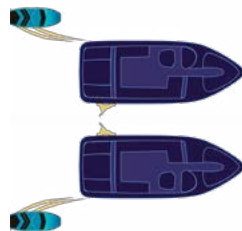

Created from our passion for water sports to deliver the best wakesurfing gear, our family of SWELL Wakesurf Creators are purposely engineered and designed to create the perfect everlasting wave.

- ✔ **It Floats**
- ✔ **High-Performance Suction Cups**
- ✔ **Marine Grade Materials**
- ✔ **Clean Design**
- ✔ **Universal - Works with Most Boats**
- ✔ **Uncompromising Customer Service**

Simple Installation

Swell Wakesurf Creators simply attach to your hull by pressing the suction cups firmly and flipping the locking levers. Simple installation that takes just a few seconds. For best results, install on the opposite side of the surfer, 3 - 4" below the waterline when your boat is fully loaded.

Installs On Opposite Side

Simply install to the non-surf side of the boat. The SWELL Wakesurf Creator delays convergence of the opposite wave, allowing the surf wave to get longer, larger and have more push. The suction cups can be removed and applied in a few seconds to the other side of the boat.

No More Leaning

You can load your ballast and people evenly throughout the boat. This allows the driver and everyone else on board to have a much more enjoyable and safe ride.

Creator 2.0™

Best Seller

Creator XL™

For boats with a lot of ballast (2,500 lbs or more)

Creator Slim™

Fits between narrow hull lines
