**HIGHWAVE INC. INTRODUCES A LEAK-TIGHT ONE-HANDED DOG
WATER BOTTLE**

CHICAGO, IL (3/2/2019)— Highwave invented the AutoDogMug® in 2014, and now has a new leak-tight version of the product. The AutoDogMug® Leak-Tight is a one-handed dog hydration system. Squeeze and water fills the bowl for your dog to drink, release and the excess water drains back into the bowl, not wasting a drop. This new and improved version has these features, plus it can lock to become leak-tight so water stays in the bowl, or when finished, can lock so water will not leak into your bag when storing.

The AutoDogMug® Leak-Tight will be available March 2019 in 6 different colors. Each will hold 22 ounces and will come with a carabiner to attach to a backpack, leash, or belt loop. Both versions of the AutoDogMug®, the original and leak-tight, are perfect for giving your dog water in the car or on the go; it fits in your car's cupholder.

Highwave's mission for 35+ years has been to help humans live in harmony with our planet. The engineers at Highwave are constantly inventing reusable products that make people's lives a little bit easier. Everything from our travel mugs for humans, to our travel mugs for dogs has been designed to respect the Earth and its natural resources.

Highwave will be at booth #N8202 at the International Home + Housewares Show showing more of their innovative products.
