## **HIGHWAVE INC. INTRODUCES 20 OUNCE DOUBLE WALL VACCUM STAINLESS TRAVEL MUG**

CHICAGO, IL (3/02/2019)—The Roam 20 ounce Travel Mug is the newest addition to the Highwave mug family. This tumbler will keep your liquids hot for 12 hours or cold for 24 hours. The inside of the mug is made from 18/8 stainless steel and is equipped with a double wall vacuum seal.

The Roam 20 ounce will come in 6 different colors and will have a stainless steel outside or a powder coating. The travel mug features a patented “no look” push button top meaning you do not have to look when taking a drink. The 360° drink-through top comes equipped with a final top, making it leak tight, so that the inside of your bag stays dry.

Highwave is also introducing new powder coat colors for their Roam 16 ounce Travel Mug as well. Both Roam sizes can be used as a reusable water bottle when not being used as a mug. Consumers can either use the drink-through top the mug comes with or can order the sport top (available February 2019) separately.

Highwave’s mission for 35+ years has been to help humans live in harmony with our planet. The engineers at Highwave are constantly inventing reusable products that make people’s lives a little bit easier. Everything from our travel mugs for humans, to our travel mugs for dogs has been designed to respect the Earth and its natural resources.

Highwave will be at booth #N8202 at the International Home + Housewares Show showing more of their innovative products.
