**HIGHWAVE INC. INTRODUCES PASTIC FREE PERSONAL BREWING SYSTEM
WITH REUSABLE LID**

CHICAGO, IL (3/02/2019)— The Earthlid™ Tumbler Brewfish is a double-wall stainless steel insulated personal brewing system. The Stainless Brewfish is a personal brewing system that allows you to brew and drink right in the same mug. The double-wall body adds insulation for both your brew and your hand and the patented filter eliminates the contact between the water and coffee/tea as soon as it's pressed.

Add your coffee or tea to the Brewfish, add hot water, and let steep for your preferred amount of time. Press all the sediment with the patented press to the bottom of the cup; this process shuts off the brewing process, so your drink is never bitter. The stainless-steel vessel with the Earthlid™ is plastic free and leak-tight. The cup can take a counter top knock down or be turned upside down when sealed.

The Earthlid™ is made from BPA free European LFGB grade silicone and the inside of the Brewfish Stainless is made from 18/8 stainless steel. Place the lid on your Brewfish, sip, and go.

Highwave's mission for 35+ years has been to help humans live in harmony with our planet. The engineers at Highwave are constantly inventing reusable products that make people's lives a little bit easier. Everything from our travel mugs for humans, to our travel mugs for dogs has been designed to respect the Earth and its natural resources.

Highwave will be at booth #N8202 at the International Home + Housewares Show showing more of their innovative products.
