

## *Relaxing haven*

Enjoy luxury bathing with the Maya bath and matching basin

### **FOR THOSE WHO LOVE A DEEP**

relaxing bath, the Maya bath with matching basin is a must-have. Designed in Australia and available through DADO, this contemporary freestanding oval bath makes a strong design statement in any bathroom.

Jacques van der Merwe designed the bath with a curved side profile and sharp edges to create a classic structure that will remain on-trend for years to come. The angle of the backrest, together with the depth and width of the bath, were all

carefully considered to ensure the bath's ergonomics were of the highest standard.

Big enough for two, the Maya bath will provide a relaxing haven for all who use it. It is constructed from DADOquartz, the first finely ground quartz- and resin-based material for bathware in the world, established in 1998. The process of material selection, treatment and finishing is tightly controlled to ensure that DADOquartz is mildew- and mould-resistant, retains heat, offers a stability of colour, does not absorb

water, and has high UV resistance and thermal shock resistance. As a result, all products carry a 25-year warranty.
