Installing your **SkyKart**

www.skywalkers.com.au

SkyKart

The **SkyKart** is the **new accessory** that transforms your Sky Walker into an incredibly fun electric GoKart that can accelerate, brake, turn on the spot, and pop effortless wheelies, all with simple and intuitive hand controls. This seated, three-wheeled vehicle is stable, manoeuvrable, and can securely attached and detached to your Sky Walker in just a few seconds.

SKYWALKER

SkyKart

- 1** Slide the T-bar pole (with the foot rest) into the wider pole with the holes.

- 2** Adjust the length of frame to suit you. Secure it in position by tightening the knob screw in the hole.

- 3** Place handle bar in position.

- 4** Secure the handles in place with screws..

- 5** Ensure both sides are secured well and screws are tightened.

- 6** Tighten bolt with spanner.

SKYWALKER

7 Protection pads.

8 Stick the protection pads on the bottom of the SkyKart.

9 Strap SkyKart to your SkyWalker.

10 Feed straps through.

Seat direction use

1 Put seat on frame and align seat holes with screws. Tighten to secure in place

2 Once seated, you can adjust length of SkyKart with the knob screw.

3 Once you are comfortable in your SkyKart, turn the SkyWalker ON.

How to Drive

Go straight: Press down on the two handle with even distribution.

Turn left: Push down the right handle and pull up the left handle.

Turn right: Push down the left handle and pull up the right handle.

Slow down/ stop: Pull back both handles equally to slow down and release to come to a stop.

Attention:

Safety gear is a must! The team at Sky Walkers recommend gearing up with Sky Pads and Sky Helemt before SkyKarting!
Make sure to check your surrounding space and stay clear of obstacles.
Children under the age of 10 should be accompanied by adult.
