

### Extension

In the packaging we have included extensions to help charge your phone over small phone grips. If your phone has a swappable phone grip, remove the top of the grip to help accelerate your charge and follow the steps below:

1. Place your suction cup extensions over the device's suction cups and attach firmly.
2. Place your stick charger over a small size phone grip or any other plastic attachment as high as 6mm on the back of your phone and attach firmly.

Disclaimer: Charging with phone grip extensions may slightly reduce the charging speed.

## STICK USER MANUAL

### In the box:

Stick X1      Micro-usb charging cable X1      Extensions to fit over small phone grips

Note:  
Compatible with all wireless charging smart phones.  
For optimum performance and safety, please read this manual carefully.

### How to Use

Align the Stick with the back of your cell phone. The single row suction cups should be on the top and the double row on the bottom. For most common models, this product ensures that the camera is not blocked during use.

### How to Turn On/Off

**Power Button**

To turn the Stick on, press the power button once and the light indicator will turn on. The light indicator shows that the Stick is in standby mode and is ready for use.

To turn the Stick off, click the power button twice or hold it down for 5 seconds.

If you leave the Stick in standby mode and you do not use it, the Stick will automatically turn off after 20 seconds.

**Indicator**

**Stick Status Indicator**

Green light on, wireless charging.  
Red light on, wireless charging is in standby.  
Red light and the green light flashes alternately, wireless charging is abnormal.

### How to Charge

To charge the product, use the standard Micro USB charging cable that is included in the box.

### Suction

When the suction cup is dirty, it may not stick well. Use a damp cloth to gently wipe the stain and dry it for use.

### Additional notes

Make sure the back of your Stick is clean. When charging your phone and using it simultaneously, it is normal for your device to slightly warm up. If you find your device to be overheating, take your mobile device away from the wireless charger and the Stick will stop charging automatically.
