COVID-19

On Monday, March 16, 2020, all the non-essential employees of Cordtec Power Corp. started to work at home to help protect each other and our consumers from contracting the COVID-19 virus.

We also wanted to do our part to slow the spread and flatten the curve. Starting on Wednesday, March 25, 2020, Governor Evers, of Wisconsin, ordered a Safer At Home Order and closed all non-essential businesses, we are an essential business and are staying open. The only employees left inside of our warehouse are 2 essential shipping and logistics employees who have been working tirelessly 7 days a week, picking, packing, and shipping, to send out orders.

One of our employees, on March 30th, became sick while staying at and working from home. The only place she had gone was to the grocery store for essential items. The symptoms she had were fever, shortness of breath, a slight dry cough, body aches, headaches, and tiredness. Because of her medical history, there were no COVID-19 test options offered and no way to know if that is what she had, until the possibility of future anti-body tests.

She quarantined herself away from her family, her husband was asked not to come to work for 14 days and followed the recommendations of the CDC. We are happy to report she has recovered and is doing well, and back to working remotely. There is no threat or danger to our products as she has not been in the warehouse, office, or touching any physical products for more than two weeks before she became ill.

The reason for sharing this story is because we want you to know it can happen to you and it is important to follow the rules and regulations of the CDC and your locality so we can get back to the lifestyles we had before the pandemic.

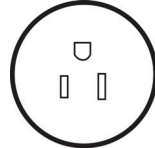

Until we can get back to our normal, or new normal, we are working hard to provide you the orders and products you need to keep your essential business working and the medical field powered.

We are taking precautions to make sure items are sanitized and safe. Thank you for taking your steps to help slow the spread and keep our nation and world as safe as you can. We appreciate you.

NEMA 5-15P

NEMA 5-15R

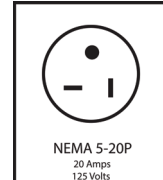

FEATURED PRODUCTS

This AC WORKS® brand medical grade power strip has 6 outlets. There are two length options available, 6FT and 15FT. This item is a NEMA 5-15P green dot power strip to six NEMA 5-15R green dot outlets. The cord is an SJTW, 14/3A hospital grade power strip. This power strip is a NEMA 5-15P, 15 Amp, 125 Volt medical/hospital grade plug is connected to 6 medical/hospital-grade outlets. *(Continued on page 2)*

TIPS FROM TONY

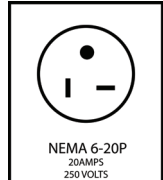

To identify the difference between NEMA 5-20 and the NEMA 6-20 male plugs is to look at them head on with the grounding pin toward to the top. If the horizontal pin is on the left side, that is NEMA 5-20P. If it is on the right side, it is NEMA 6-20P. For an outlet or female connector, look at it with the grounding pin towards the top again. This time, the horizontal pin will be flipped. So NEMA 6-20R it will be on the left and NEMA 5-20R it will be on the right.

EMPLOYEE RECOMMENDATIONS

Center for Disease Control Website

The topic of COVID-19 is an emerging, rapidly evolving situation and CDC will provide updated information as it becomes available.

We use the Centers for Disease Control website to find all important and relevant information on the topic and suggest you do the same.

You can learn how to protect yourself, the symptoms to watch for, what to do if you become sick, how to slow the spread, and more information about the cases in the United States.

You can also learn how to cope with the changes of daily life and stress due to the Coronavirus outbreak.

INDUSTRY NEWS

McCormick Place

One of Many Coronavirus Field Hospitals

Just a few months ago, Cordtec Power Corp. was in Chicago for RSNA, one of the world's largest annual medical meetings. The meeting is held in late November into early December each year.

Today, downtown Chicago's McCormick Place is filled with thousands of patient rooms, nurse stations, medical supply storage, a pharmacy and more, turning this large convention center into a Coronavirus Field Hospital.

There have been more than 400 medical professionals hired and trained to run this alternative care facility. One of the largest, if not the largest of its kind in the United States.

Obviously we hope this care center does not need to be utilized and that we can slow the spread as quickly as possible. However, it is nice to see the city is preparing for the possibility of the need for more medical facilities.

What area of the world are you reading from and what is happening in your area to help slow the spread or help those infected and save lives?

Share your stories with us at marketing@acconnectors.com and any pictures you have. We would love to hear more success stories and happy news during these trying times.

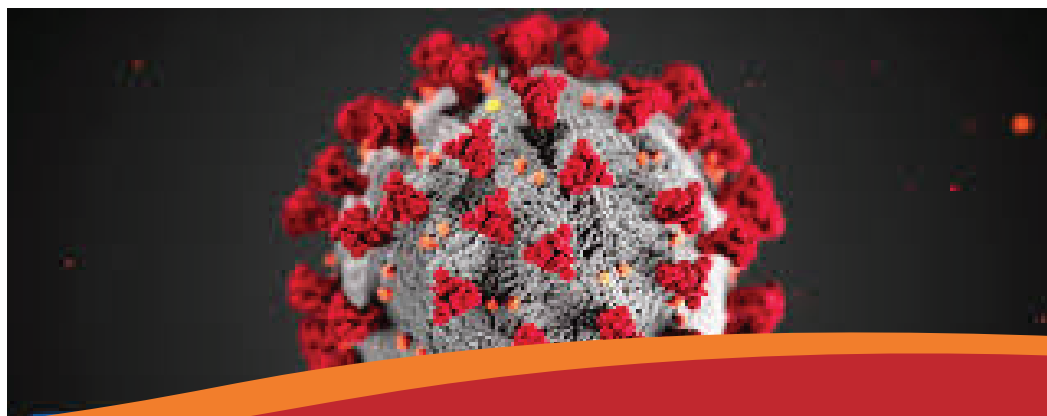

IMPORTANT NEWS FROM AC WORKS®

Helping The Medical Community

AC WORKS® Brand Products Power Medical Equipment

In early April we received an inquiry from a third party company looking to outsource some medical power products for CDC medical equipment. We did have the item in stock so AC Connectors placed all warehouse stock on an immediate hold for CDC use only. Once the order was placed and shipped we opened the remaining stock back up for other orders.

We also offered CDC products a 30% discount on same day rush shipping to help save them money and get the products quickly. What have you been doing to help your community and medical staff with the COVID outbreak?

Sandra's on the Park
Hales Corners, WI

Sandra's on the Park and many other restaurant owners are working hard to keep the community fed during our Safer At Home Order. Remember to order local for meals using delivery, curbside pickup, and support your community.

BEHIND THE SCENES

We are offering our employees the benefit of a \$50 per week food bonus they are allowed to use in locally owned community restaurants through the Safer At Home Order. This allows us to help them and the community at the same time.

FREQUENT FEATURE

Double ended male plug adapters are a product commonly asked for. We want to explain we don't buy, sell, or special request these products because they are extremely dangerous to use.

You can be shocked, cause a shock to someone else in your home, or cause a fire in your home. If you have any more questions about this type of product and their safety hazards please contact us at (414) 434-2220 via phone or (414) 323-3240 via text and we will help.

E-mail your questions to

UPCOMING SHOWS

tradeshow, expo, and event news

HIMSS20: Orlando, FL | Event has been cancelled

This will be the first time in 58 years the event has been cancelled, but it is clear that cancellation is unavoidable in order to meet HIMSS' obligation to protect the health and safety of the global HIMSS community, employees and for all.

EWPT 2020: Milwaukee, WI Event has been cancelled

The Wisconsin Center District and Expo Productions Inc. confirmed postponing the Electrical Wire Processing Technology Expo is not going to be an option. Due to a full schedule they are forced to cancel this year's event and move forward with planning for May of 2021. See you next year at EWPT 2021.

COVID-19 Coronavirus Statement

As all communities work diligently to best address COVID-19 (coronavirus), we want to maintain as safe an environment as possible. We will continue to operate as normal as possible during this challenging period and ask that staff and customers join us in observing best practice keeping as safe as possible.
