How to Use the Attached Ground Wire

This AC WORKS® brand dryer adapter includes an attached green grounding wire. For your equipment to be grounded, please follow the instructions below:

1. Grab the grounding pin on the green 5-foot cable and plug it into the grounding hole in any regular household outlet near your equipment.

(1) Ground pin inserted in household outlet.

2. If a household outlet is unavailable, you can ground your equipment using a heavy-duty metal clamp (not included), just clamp the grounding pin to a nearby metal pipe.

(2) Securing the ground pin using a heavy-duty metal clamp

3. You can also use an adjustable galvanized hose clamp (Not Included) to attach the grounding pin to a nearby metal pipe. Use a screw driver to tighten the clamp over the pin.

(3) Use an adjustable galvanized hose clamp.

4. You can also remove the pin and attach a 12-10 AWG ring terminal (not included with adapter). With a self drilling metal screw, you can attach the grounding wire to a part of your home's metal frame.

(4) Remove the pin and attach a 12-10 ring terminal.

WARNING!!

IF THE GROUNDING PIN IS NOT INSERTED INTO THE HOUSEHOLD OUTLET.
