Tesla Gen I Mobile Connector

Our **AC WORKS®** brand products are compatible with the Gen I Mobile Connector by Tesla.

SAVE 20% WITH COUPON CODE: TeslaGen2 (See page two for details.)

Tesla Gen II Mobile Connector

Our **AC WORKS®** brand products will require the NEMA 14-50 pigtail adapter for Gen II compatibility.

Charging Limits

Some charging adapters, not made by Tesla, may trip your breaker because Tesla on board computers will not recognize the adapter. Tesla adapters autoset the charging limit to 80% of the total amperage when recognizing the adapter. **AC WORKS®** has a powerful solution to avoid tripping your breakers, meet the G2EV1450PT adapter.

When purchasing a new Tesla vehicle you will no longer find the Gen 2 NEMA 14-50 adapter included with the purchase. Tesla recommends you purchase each adapter you need individually. This NEMA 14-50 adapter works in conjunction with various **AC WORKS®** adapters to form any combination you need for powering your electric vehicle. It also comes installed with a chip that pre-sets your charging limit to either 24 or 32 Amps, depending on the adapter you purchase.
