## Company COVID-19 Updates

See how we are providing you the safest customer service we can.

As the COVID pandemic seems to change weekly, daily, and sometimes hourly, we want to keep you updated on what we are doing at AC Connectors of Cordtec Power Corp. to keep you safe.

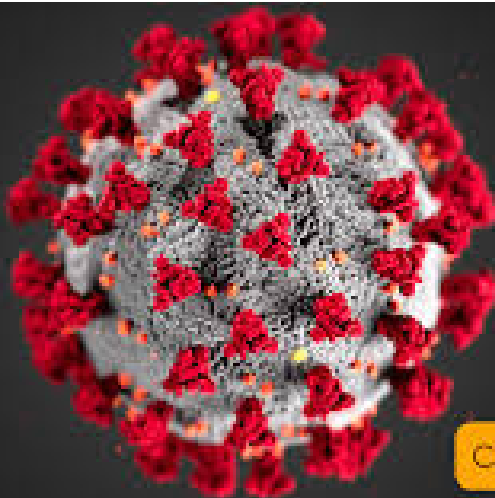

We are continuing to have our non-essential employees working from their home offices while trying to keep the warehouse and products as clear of as many people as we can. They are continuing to bring you new and relevant products to help the medical industry.

As sales are increasing, warehouse employees are working harder than ever to keep up with the demand in the warehouse and shipping and receiving departments. They are in the warehouse daily, working hard to make sure all items are clean and sanitized when they arrive at our warehouse.

Shipping staff works as safe as they can, wearing masks, gloves, sanitizing work stations, and keeping a distance from each other as they work.

We have closed the showroom to the public and have done the best we can to keep you safe when preparing and shipping your orders.

### TIPS FROM TONY

If we mention "wired specifically for Tesla usage" in our EV adapter listings, we mean it. These EV adapters cannot be used for anything else. It is not possible to power RVs, dryers, or other equipment with our gray EV adapters. Chances are they will match the NEMA configurations you are trying to adapt to, but you can only charge Tesla vehicles with them.

## FEATURED PRODUCTS

(Cont. Page 1)

This AC WORKS® EPL1430KIT, generator L14-20 inlet kit can get power from any style of generator to the NEMA L14-20 4-Prong household power input inlet box.

The kit includes 4 adapters to connect with a 25FT NEMA L14-20 extension cord. ### COUPON CORNER

Automatically receive 10% off your order of the EPL1420KIT and the EPL1430KIT for one week, today through August 7, 2020.

### EMPLOYEE RECOMMENDATIONS

The Tesla lineup of electric vehicles is growing and helping to provide power by use of sustainable energy.

Currently they have the Model 3, Model S, Model Y, Model X, and the Cybertruck.

They also have solar panels for your home and more.

## INDUSTRY NEWS

### 2021 Ford F-150 Hybrid

At AC Connectors, we follow very closely to updates from Tesla and other EV manufacturers. This time, Ford grabbed the spotlight with an innovation for their upcoming F-150 Hybrid pick-up truck: an onboard power panel.

Vehicles usually have household outlet(s) available to charge phones or power small electronics. Most pick-up truck owners use their truck for their job or hobby, so why not have a full blown panel of different outlets available? The usual outlets that would come on a generator are still available. You can use a NEMA L14-30 outlet for high power machinery or appliances, as well as several outlets to power the smaller tools or appliances.

There are different models to choose from that vary in outlets and wattage output all the way up to 7,200 Watts. That's enough to power your mobile welder for up to 32 hours on a single tank of gas! If that is exactly the type of work you would be doing, you would need AC WORKS® brand adapters to adapt your 650 welder plug to the L1430 outlet available. The compact WDL1430650 and flexible WDL1430650-018 will work perfectly for that.

If you pick a lower wattage model that runs at up to 2,000 Watts, it will come with just a couple 20A household outlets. You can still power the essentials for a tailgate or DIY drive in movie theater like a heater, TV, projector, speakers, and mini fridge. You can add more outlets by using our ADV104, PSROT-072, or S515B515-060. If all you need are extension cords, we have you covered with S520PR which comes in lengths of 10, 25, and 50 feet. If you do happen to own one of these trucks, let us know what you use it for!

## IMPORTANT NEWS FROM AC WORKS® Newly Restocked

A low inventory of power products has been restocked and is shipping.

A low inventory of products was restocked recently, providing many options for AC WORKS® brand power supplies to you. We have stocked many extension cord options, protective power products, medical products, and more.

View some of the items recently restocked below, and visit [www.ACWORKS.com](http://www.ACWORKS.com) to purchase.

# BEHIND THE SCENES

We have been taking this time to make improvements and one of those is the improvement of our product imagery.

## NOTICE

Due to COVID-19 and the overwhelming response it has had on shipping, warehousing and logistics, and online shopping, we want you to keep in mind your orders may be delayed.

We have been staying on top of shipping in our warehouse but have no control over UPS, USPS, and FedEx, how quick their shipping times are, and if products are being scanned into tracking as expected. Please be patient and kind to all essential workers during this time.

## COVID-19 Coronavirus Statement

As all communities work diligently to best address COVID-19 (coronavirus), we want to maintain as safe an environment as possible. We will continue to operate as normal as possible during this challenging period and ask that staff and customers join us in observing best practice keeping as safe as possible.

## NEW PRODUCT RELEASE

### *Protective Power Adapters by AC WORKS®*

Protective power by AC WORKS® offer flexible adapters using high power household outlets, like dryer or range outlets, to power regular household outlets. The adapters include 20 Amp breakers for safety. Some of these products are compatible with generator and RV power as well. There are also options for powering HVAC. Here is a sampling of our protective power products.

## IMPORTANT DATES TO REMEMBER
