## Emergency Power Protection Options

AC WORKS® brand products have much to offer for those who need emergency power. What you need depends on what you have at home to provide back up power. As seen in our featured products section you will see the PD4GF-010, a chainable PDU product available for back up, emergency, and other types of power.

Combine the PD4GF-010 along with our L1430PR, NEMA L14-30 heavy-duty extension cord for extra length. You can also combine the L1430F520-05BK flexible adapter with the PD4GF-010 to give yourself even more 20 Amp outlets. It also helps avoid tripping of the GFCI outlets if necessary for the project you are working on.

L1430PR

L1430F520-05BK

We also have a number of circuit breaker adapters for extra protection when using back up power, use the L14-30R locking outlet to combine L1430CB620 flexible adapter and the PD4GF-010. The breaker is designed to protect you by tripping if you draw more than 20 Amps of power. During a power outage in the summer months you can use the L1430CB620 HVAC 220V adapter to keep your air conditioner going.

L1430CB620

## FEATURED PRODUCTS

The PD4GF-010 is a chainable PDU with a 10ft L14-30 extension cord, meets OSHA requirements, and is ETL approved.

It features heavy-duty outlets and an anti-cold weather jacket, keeping the extension cord flexible in harsh temperatures.

This generator extension cord has a NEMA L14-30P, 30 Amp, 125/250 Volt, locking plug to (4) GFCI NEMA 5-15/20R, 20 Amp, T-blade household female connectors. There is also an L14-30R outlet, allowing you to chain multiple PD4GF-010 cords together.

*(Featured Products are Continued on page 2)*

## TIPS FROM TONY

When deciding on which 3-prong extension cord you need, double check your equipment requirements. If it needs 220 volts, it will most likely be our NEMA 6-20 cord.

If it is a regular 110 volt, it will be our NEMA 5-20 cord. And always be sure to double check the configuration of both.

## FEATURED PRODUCTS

(Cont. Page 1)

This AC WORKS® brand Flood Restoration Equipment Power Distribution (PDU) Kit [RDKIT01] includes 4 of our indoor/outdoor products allowing you to find solutions from all residential high power sources. The 3 and 4-prong dryer outlet, 14-50 range outlet, and 4-prong generator outlet are all compatible with this kit.

This kit is great for flood restoration, bed bug mitigation, builders, indoor food service, and contractors.

This kit has the length you need to get power throughout your job-site and connect all the power tools you need. No breaker tripping or shortage of available outlets.

## EMPLOYEE RECOMMENDATIONS

### IMAGE 360 Franklin

IMAGE 360 has completed multiple projects for us at Cordtec Power Corp. and have always provided great customer service.

They designed our showroom wall coverings as well as printing our trade-show backdrops. We recommend giving them a try if in our area and finding the location near you, if they are not.

## INDUSTRY NEWS

### SpaceX

History has been made!

Because we follow Tesla very closely, we also take interest in other companies run by their CEO Elon Musk. Recently his other company, SpaceX, had an historic launch carrying two NASA astronauts to the ISS from American soil for the first time since 2011, making it also the first time a private company put people into space and docked with the ISS.

If you streamed the launch, you were given a look at the inside of this high-tech space ship. SpaceX spokespeople gave a brief overview of the ship's specifications and how it works. One very cool thing about it all was how small the onboard computer systems were. Space flight has gone from having a giant computer and dashboard to just a few touch screen tablets. They also informed viewers that much of the flight to the ISS was automated.

This is huge for those interested in space travel, as this will now begin to open the doors for private passengers to orbit our planet, travel to the ISS, the moon, and eventually even further.

SpaceX also strives to reduce the cost of space travel by re-using rockets and ships. With this big success, they now look forward to finish their next project: Starship. With Starship, they plan to send people to Mars and beyond. We look forward to the next big step in space travel!

## IMPORTANT NEWS FROM AC WORKS® Flood Restoration

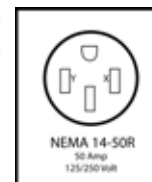

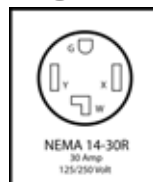

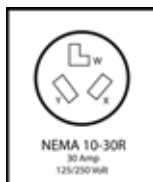

Learning from Local Restoration Professionals

We want to help you learn how you can power your professional and household flood restoration equipment to clean up after the unexpected events that can often occur during spring and summer months.

AC WORKS® brand offers adapters that use dryer or range outlets to power heaters, fans, dehumidifiers and other equipment or tools necessary to clean up after a flood, fire, or bug infestation, and more.

AD1450L1430, AD1430L1430, S10301430-018, L1430F520-025, S1430F520-018, S1450F520-018 will all help you power your high power equipment. This helps to keep you from tripping breakers while trying to work toward a dry and clean project.

See the common NEMA configurations for high power home outlets below.

# BEHIND THE SCENES

As mentioned previously, in our Employee Recommendation section, Image 360 worked on our showroom walls.

We thought this was an appropriate time to show you a behind the scenes peek into our office and the great work they provide for us.

Take a look at some of the work Image 360 has done for us in the past.

## NOTICE

Due to COVID-19 and the overwhelming response it has had on shipping, warehousing and logistics, and online shopping, we want you to keep in mind your orders may be delayed.

We have been staying on top of shipping in our warehouse but have no control over UPS, USPS, and FedEx, how quick their shipping times are, and if products are being scanned into tracking as expected. Please be patient and kind to all essential workers during this time.
