### GENERATOR TIPS

1. Never use your generator in your home, office, garage, carport or screen porch. The exhaust can cause sickness or even death.
2. Keep your generator at least 10 feet from your house. The exhaust can melt your vinyl siding.
3. Use a battery-powered Carbon Monoxide detector when running your generator.
4. NEVER plug your generator into your home outlet.
5. NEVER operate under wet conditions. Try to protect the generator from rain and snow.
