## HIMSS and EWPTE

Updates for 2021 events.

You may know we are planning to attend the HIMSS21 and EWPTE21 shows. Because we are attending we want to provide continued updates on the two as they creep closer.

### HIMSS21

As we know, the 2020 HIMSS conference that was supposed to be held in Orlando was cancelled due to the worldwide pandemic. This year the 2021 HIMSS conference is scheduled for August 9-13, 2021 in Las Vegas, NV. This event is going to be held in the Venetian-Sands Expo Center, Caesars Forum Conference Center and Wynn Las Vegas.

As part of the health care industry, we know how important the health and safety of everyone is. We want to share some of the ways HIMSS is addressing health and safety concerns. First and foremost, the coronavirus outbreak and pandemic is being monitored by HIMSS and will follow CDC and WHO guidelines to develop an on-site preparedness plan.

If you were registered for HIMSS20 your registration will be transferred over to this year. Registration for HIMSS21 is opening soon. Something to keep in mind is the plan for the HIMSS22 event. This event is still planned to return to its usual schedule in March of 22, in Orlando, FL. HIMSS is planning to keep the event as scheduled. If any changes arise from the current HIMSS schedule you will hear it from us.

### EWPTE21

EWPTE held in Milwaukee, WI is unfortunately having to postpone the event until next year. They have postponed the 2020 event to May of 2021 and are now postponing the event again for next year. The dates are May 10-12, 2022 at the Wisconsin Center in downtown Milwaukee. The full press release can be found here.

- (4) IEC C13 Sheet F Outlets with Grounding Wire
- IEC Power Strip
- Kiosks Power Strip
- Data/ IT/ Server Cart Power Strip

(Continued on page 2)

### TIPS FROM TONY

Changing the plug end of your GEN II Tesla Mobile Connector can take more of an effort than you realize. Firmly hold the household plug that comes with your Tesla, give it a good pull, and if it does not release, pull a bit harder. Once the adapter is released you can plug in the level 2 plug and charge much faster.

## FEATURED PRODUCTS

(Cont. Page 1)

This AC WORKS® brand IT/Server Power Strip [WS-045-0-4] is a heavy-duty but quality product. It is an IEC IT/ Server/ PDU power strip. It has a 7.5-inch housing IEC C14 power input Inlet to (4) IEC C13 Sheet F outlets. It is commonly used in IT/Server for power distribution units.

- IEC C14 Inlet for Power Input
- CPU IT/Server/ PDU Power Strip
- (4) IEC C13 Sheet F Outlets
- IEC Power Strip
- Kiosks Power Strip
- 5-Year Limited Warranty

## CUSTOMER FAVORITES

The AD1430630 is our compact adapter used for commercial HVAC connections. This product is our most purchased and we can show you why.

This adapter has a sleek elbow shape with a heavy-duty design able to withstand the toughest handling. Seriously, we pitched it to a metal bat leaving not one scratch or dent and still completely functioning.

This adapter plugs into a NEMA 14-30R dryer outlet and is capable of powering your 250 Volt heater or air conditioner. Let us know if you have any questions or need a different solution by emailing our sales engineers.

## INDUSTRY NEWS

There is a nice lineup of electric vehicle's entering the market soon. We thought we would take this time to share some of them with you.

### 2021 Mustang Mach-E

The redesigned muscle car turned electric vehicle is scheduled to hit the roads this year. The RWD version with an extended range battery is said to take you 300 miles on a single charge.

### GMC Hummer EV

There will be multiple versions of the EV Hummer, taken over by GMC. They have removable roof panels, off-road capabilities and the three-motor option is said to go up to 400 miles on a single quick charge. You can also take them for a crab walk or lift the body to get out of tough spaces.

### Tesla Cyber Truck

Elon Musk wants a "really tough" truck, so he built one with futuristic designs and protective technology. The three-motor version of the Cyber Truck will travel up to 500 miles on a single charge.

### Polestar 2

The Polestar designed by Volvo will take the streets with a pair of motors giving you the ability to travel up to 275 miles on a single charge. They will have environmentally friendly amenities like the vegan interior.

### Volkswagen ID.4

Volkswagen is working on multiple EV designs but today we are going to touch on the ID.4. This vehicle is being produced domestically in Chattanooga, TN and

## IMPORTANT NEWS FROM AC WORKS® *AC WORKS® In Canada*

We have talked about our products entering the Canadian market in the past. When the products were launched in Canada there was overwhelming interest. This is because we can save you money and shipping costs if you are located in Canada by ordering from our Canadian market. We have talked about the products on Amazon.ca and eBay.ca in the past but now we have set up our products for HomeDepot.ca as well.

Working together with eShipper we make sure any orders from our Canadian markets are shipped out quickly and efficiently. Currently within eShipper we have over 200 products and are selecting more products regularly as they grow in popularity and request.

With any new business venture, there is always a learning curve. We are learning which connections are most popular. So far, we have learned that the NEMA 6-30 connections seem to be very popular among our Canadian customers. With this in mind, we are thinking of new adapters and cords to create in the future. We are working on updating some of our instructions and assembly guides for our French-speaking customers in Canada.

We are also working on the construction of our ACWORKS.ca site allowing our Canadian customers to order directly from us with no worries about shipping, returns, or extra costs.

# BEHIND THE SCENES

## Up Close and Personal

We are working hard to give an up close and personal view of our products at all angles.

## FREQUENT FEATURE

NEMA L14-20 and NEMA L14-30 are a couple of configurations that get confused the most. Although they look somewhat similar, there is a distinct tell that sets them apart: the grounding pin. For both a plug and connector, the NEMA L14-20 ground pin has a notch that sticks up. For NEMA L14-30 plugs and connectors, it goes the opposite way and sticks inwards.

The direction does not change between plugs and connectors for both of these configurations.

# UPCOMING SHOWS

## tradeshow, expo, and event news

### HIMSS21: Las Vegas, NV | August 9-13, 2021

We are scheduled to attend HIMSS21 in Las Vegas, Nevada at the Sands Expo. You will find us in booth #8307. See you next summer in Vegas.

### EWPT 2021: Milwaukee, WI | May 10-12, 2022

The Wisconsin Center District and Expo Productions Inc. has announced the Electrical Wire Processing Technology Expo *dates for 2021 have been postponed to 2022*. The new dates are May 10-12, 2022 for EWPT. Find us in booth #1916 next spring.

### COVID-19 Coronavirus Statement

As all communities work diligently to best address COVID-19 (coronavirus), we want to maintain as safe an environment as possible. We will continue to operate as normal as possible during this challenging period and ask that staff and customers join us in observing best practice keeping as safe as possible.

## NEW PRODUCT RELEASE

### Try Our New Products

#### G2EVTT30-24

This NEMA TT-30 adapter comes installed with a chip that pre-sets your charging limit to 24 Amps. It can be used with your Generation II Tesla Mobile Connector to charge your car at a campsite/RV outlet. Pictured below.

#### SD620PR

This AC WORKS® brand super-duty extension cord [SD620PR] is popular for use with HVAC, emergency power, industrial construction, and electric vehicle charging. The new super-duty cable is an SOOW, 10/3, 30 Amp copper wire with a 600 Volt rubber jacket, and will reduce the percentage of voltage drop over long distances.
