Mesh Grille Fitting Instructions

1. Removing existing moulding as shown in **fig 1**.
2. Fit masking tape around aperture to protect paint (**fig 2**).
3. Guide the LH side of the grille behind the aperture (**fig 3**) and then guide the RH side grille behind the aperture also making sure that all of the brackets have passed through the slots (circles in **fig 2**) and have clipped into position (you may have to slightly flex the grille once you have the LH side in position to allow the RH side to clip into position) (**fig 4**).
4. Now that the grille is in position check that all the brackets have engaged properly, you can do this by using a thin screwdriver through the mesh as shown in (**fig 5**).
5. The grille is now complete.
