Grille Fitting Instructions

1. Removing existing moulding as shown in **fig 1**.
2. Fit masking tape around aperture to protect paint (**fig 2**).
3. Guide the LH side of the grille behind the aperture (**fig 3**) and then guide the RH side grille behind the aperture also making sure that the upper brackets have clipped into position (you may have to slightly flex the grille once you have the LH side in position to allow the RH side to clip into position) (**fig 4**).
4. Now that the grille is in position check that all the brackets have engaged properly, you can do this by using a thin screwdriver through the mesh as shown in (**fig 5**).
5. Fasten the grille to the existing aperture making sure the grille is tightly fixed into position (**fig 3 & 4**) (Do not over tighten screws). (**Fig 6**).
6. The grille is now complete.
