Grille Fitting Instructions (Option 1 Without Cutting Out)

1. Fit masking tape around aperture to protect paint.
2. Offer the grille to aperture and gently push the grille into position making sure all the brackets clip behind the aperture (fig 1).
3. Check that the clips have engaged if not, put pressure on the front of the grille, lever the brackets behind the existing plastic grille with a flat screw driver until they lock into position (Fig 2 & 3).
4. Screw the pins through the U brackets into existing plastic (Do not over tighten) (Fig 4).
5. Remove the tape and the grilles are now complete.

Grille Fitting Instructions (Option 2 With Cutting Out Solid Plastic)

1. Fit masking tape around aperture to protect paint.
2. Using a hacksaw or cutters carefully cut out the existing plastic as shown in fig 1, & 2. (You can cut out most of the aperture to allow more air intake but must leave the plastic in place where marked Red as shown in fig 3)
3. Offer the grille to aperture and gently push the grille into position making sure all the brackets clip behind the aperture (fig 4).
4. Check that the clips have engaged if not, put pressure on the front of the grille, lever the brackets behind the existing plastic grille with a flat screw driver until they lock into position (Fig 5).
5. Screw the pins through the U brackets into existing plastic (Do not over tighten) (Fig 6).
6. The grille is now complete.
