

# Fast and Easy Invisible Zippers

## Instructions

[www.HomeSewingDepot.com](http://www.HomeSewingDepot.com)

The invisible zipper is hidden in the seam which creates a beautiful finished pillow.

Sew decorative cording on front side of pillow.

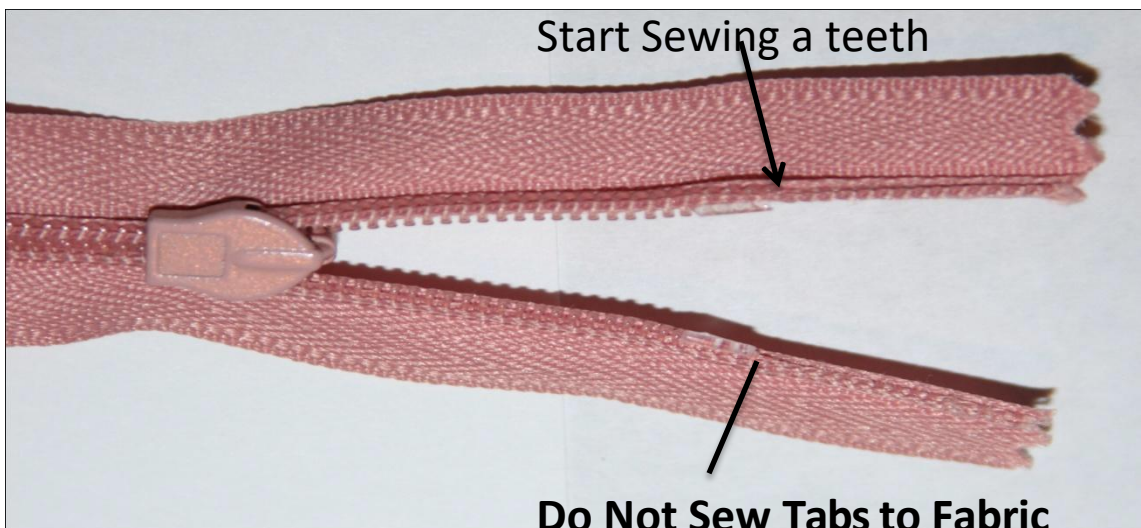

Ending point

Starting Point

If Zipper is wider than the width of pillow  
You still must stop sewing at this point

Place zipper right side down on fabric and the zipper teeth should be placed next to the trim.

Stitch zipper starting at teeth to the pillow ending 2 inches from the end of fabric.

If your zipper is longer than the pillow it is important to stop sewing at this point

Ending 2 inches from outside edge of pillow

Re stitch the zipper a second time rolling the teeth open and stitching closer to the teeth

Close the zipper and lay the fabric over the back side of your pillow fabric matching outside edges together.

Open Zipper at this time. With right sides together pin the zipper in place on the bottom fabric. Based zipper in place.

Return to the beginning of the zipper and roll the teeth open and stitch closer to the zipper teeth.

Lay the front and back of the pillow on a flat surface and zip the zipper closed

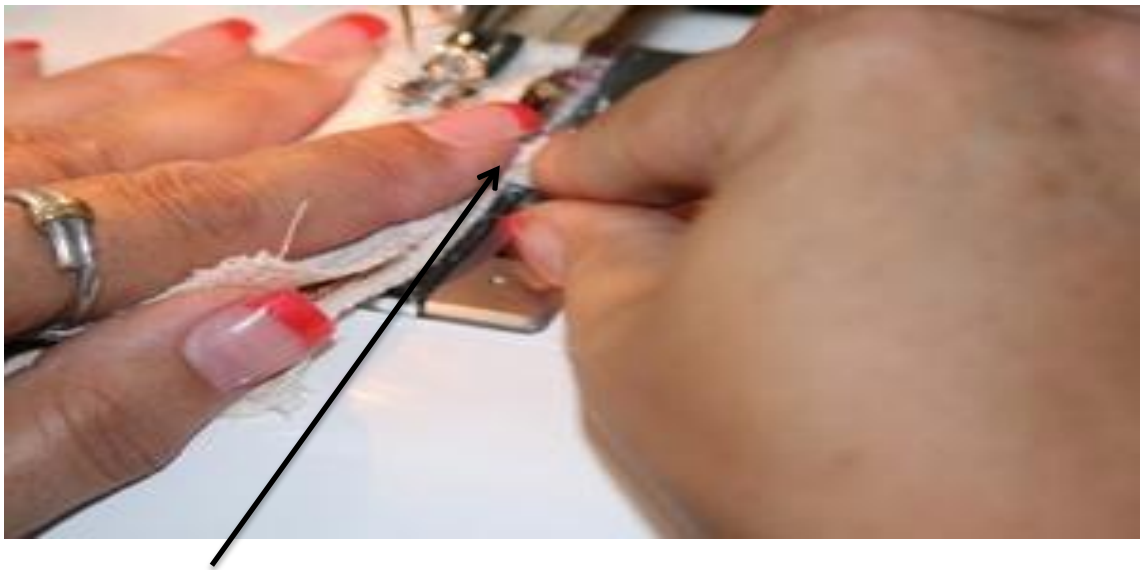

Now you are ready to close the ends of your pillow

With right sides together you will be closing the both ends of your pillow.

Starting at the zipper back stitch several times , continue to sew across the bottom of the pillow.

Hold the Top tabs of the zipper out and back stitch several times and sew across the pillow to the out side edge

## Most Important

Un-zip the zipper before sewing your pillow together

With right sides together sew the pillow together.
