

Parker Cylinder Conversion Program

Burton is teaming up with the industry's premier cylinder producer, Parker, to replace obsolete and long lead time cylinders with the best cylinders in the industry. Our highly flexible conversion program makes it easy to upgrade any existing cylinder, regardless of brand name, to a more efficient option from Parker.

This upgrade comes with better aftermarket support, including seal kits and parts, as well as the shortest lead times on production orders in the industry. Plus, an improved design means they'll outlast the competition, making them the clear choice when you're looking to improve the cylinders in your operation.
