

Mill Chain, Sprockets, Parts and Service

Sharp Top Chain

Sprocket solutions for mills

With thousands of feet of brand-name chain and sprockets in stock, we can fulfill all your chain needs for any mill application.

Chain Types

- Roller Chain
- Sharp Top Chain
- Welded Steel Chain
- Engineered Chain
- Malleable Chain
- Leaf Chain

Engineered chain

Mill Chain

- Roller Chain - drive chain applications, conveyors, transfer applications. Matched to the load requirements
- Engineered Chain - transfer deck applications. Can be welded with pipe lugs, roller lugs, non-marking UMHW and more.
- Sharp Top Chain – for infeed modules and high-speed applications requiring gripping function.
- Camelback Chain - transfer decks, moving finished grade and green lumber.
- Welded Steel Chain - log decks, log lines, waste conveyors.
- We work with and supply chain from only top-quality manufacturers to ensure long tool life and mill uptime.

Chain and Drive Supplies

- Sprockets – Single sprockets, double single sprockets, double sprocket, pintle chain sprockets, extended pitch sprockets, idler sprockets, mill chain sprockets, and custom sprockets
- Repair Links – Pin Link, Roller Link, Connecting Link, Offset Link and more
- Bearings, Couplers, Collars

Through its relationship with USNR, Burton Mill Solutions can deliver OEM-quality industrial wear parts to your mill. In addition to chain and sprockets, our solutions include Saw Arbors and Guide Arms.
