

## MODEL CTM-13

# COOLANT FILTRATION SYSTEM

Invest in a healthier work environment and protect your machinery investment with Model CTM-13 filtration system from Cut Technologies Machinery. The CTM-13 rapidly removes carbide, cast metals, and ceramic grinding materials from oil and/or water based synthetic coolants. Coolant filtration improves grinding finishes, reduces cobalt leaching, reduces wheel loading, and greatly extends coolant life.

## SPECIFICATIONS

- For saw or knife grinders
- Filters up to 13 gallons per minute
- Works in oil and water based synthetic coolants
- Includes intake hose and coolant return hose
- Available for portable or fixed position usage
- GFI protected for safe operation
- Electrically inspected

## ELECTRICAL

- 110 volt, 1 phase

## SIZE

- Length 27" x Width 18" x Height 40"

## FILTERS

- Available in 5 and 10 micron size
- C2FILTER-2005S - 5 Micron Filter
- C2FILTER-2010S - 10 Micron Filter
- C2FILT-20-KIT - Filter Housing Kit 20"
