

Hundreds, Tens, Ones Trading Game

Standard: 2 NBT 1

Materials:

- Place Value Chart
- Popsicle Sticks
- Rubber Bands
- 1-6 Digit Die

Instructions:

1. Roll the die
2. Take that number of popsicle sticks and place them in the ones column
3. Remember that I can't have any more than nine ones in the ones column and nine tens in the tens column. Once I get more than 9 popsicle sticks in the ones column, I have to make a bundle of ten and put that bundle in the tens column and leave the remaining ones in the ones column. Once I get more than 9 bundles of ten in the tens column, I have to make a bundle of one hundred

(ten bundles of ten) and put that bundle in the hundreds column.

4. Say out loud:

- how many bundles of hundreds,
- how many bundles of tens in the tens column
- how many ones in the ones column
- how many bundles of ten altogether on the board
- how many ones altogether on the board
- Keep playing until I reach 400.
