

Division Models

Standard: 3OA2

Materials:

- Number Cards (cut up)
- 1 x 6 sided number die
- Counters
- Score Sheet (in plastic sleeve)

I Can:

- Place the cards face down on the desk
- Take turns to draw a number card. Use that number of counters to make an array
- Record on the score sheet
- Take turns to roll the die. This is the number of equal rows to have in the array. Record
- Make an array with the number of rows and number of counters (you may have some left overs remaining)
- Score points by counting the number of counters in one row
- Play 6 rounds.

Division Models

Number on Card = Number of counters	Number on Die = Number of Rows	Number in Each Row	Number Model	Points

6	7	8
9	10	11
12	13	14
