

# CHADDSFORD WINERY

## A MURDER IN TIME VIRTUAL MURDER MYSTERY

JANUARY 2021

### SYNOPSIS

In the spring of 2020, in an effort to earn a little extra cash during the pandemic shutdown, Chaddsford Winery decides to rent out some space in their cellar to renowned scientist Dr. Vincent Vignoles. Dr. Vignoles (affectionately known as "Doc") had recently outgrown his own lab. He needed somewhere bigger, and with more power, to test his latest invention. What the folks at Chaddsford didn't realize is that Doc was actually working on a time machine... and they would soon be his latest test subjects!

Fast forward to January 2021: Chaddsford's wine educator, Rachel Brown, is ready to conduct one of her weekly virtual wine tastings with a group of enthusiastic customers. She preps her wine, logs onto Zoom, and anxiously waits for her guests to join the session.

As the virtual tasting beings, she realizes something is not quite right. Doc logs onto the call and interrupts her. The time machine has malfunctioned! It has attached itself to the wireless connection of the Zoom call placing all virtual guests in grave danger! Suddenly, guests begin to disappear from the call and then reappear. Most rejoin the group unscathed... but are now stuck in different periods of time! And, one unlucky guest even finds themselves dead!!

How can this be? A virtual murder? A time traveling adventure?  
And, what about the wine tasting?!

**Join Rachel Brown as she uncovers the clues to figure out:**

Who is the murderer...?

What time period did the murder actually occur in... ?

And how can we fix that blasted time machine to get us all back to 2021!?!?
