

Model 6000A-2, shown with optional 66091 and 66089.

STANDARD FEATURES

- Sturdy steel frame and aluminum hoods with powder coat grey, or black finish
- Durable, scratch-resistant finish that is easy to clean
- 120-volt unit that plugs in a 15-amp outlet
- A 6-foot cord
- One-year parts and labor warranty

TYPICAL SPECIFICATION

All infrared bulb warmers shall be constructed of powder coated steel and powder coated aluminum materials. Every unit operates standard on 120-volt/15-amp power with a wattage of 250 per bulb (ranging up to 2,000 total watts for an eight-bulb unit). See model specifications for information regarding the approval of ETL, and shall be listed with the National Sanitation Foundation.

Made in U.S.A.

Infrared Bulb Warmers

model #: **6000A-2** (shown)

Keep plated foods at optimum serving temperatures while maintaining their appetizing appearance with Nemco's complete line of infrared bulb warmers. Each unit is perfect for holding baked foods, such as rolls, breads and desserts, as well as your most popular fried favorites and side dishes like chicken fingers, poppers, French fries and more. Or use them for steamed and broiled foods too.

Like all Nemco equipment, these bulb warmers are designed to fit any kind of commercial space and size requirements, with portable freestanding and permanent hanging-fixture designs available. All models feature an attractive, classic reflector hood design that blends easily with any interior style. The powder coat hood finish topped with a scratch resistant clear coat is durable, easy to clean and maintains its attractive appearance over a long period of time. Plus, you can order your own custom configuration with the option to specify color finish. The standard bulb package includes a set of clear, 250-watt infrared bulbs. Red 250-watt infrared bulbs and white, shatter-resistant 250-watt infrared bulbs are also available.

Countertop Bulb Warmers
