

LITTLE SEED FARM

YOUR GUIDE TO PIT PERFECTION

At Little Seed Farm, we love to help people make the empowering and healthy switch to our natural deodorant. It's green, it's clean, and IT WORKS! Get ready to fall in love.

Kickstart your transition to our Deodorant Cream with these 3 tips to maximize effectiveness and improve your experience.

1. APPLY LESS

Trust, friends.

We know - you're using natural deodorant and that's scary enough. No one wants their deodorant to fail them in a stressful meeting, a tough workout, or when their kids are having a meltdown in the middle of Target. That's why you need to know this very weird yet very real fact about our natural deodorant cream:

Too much of a good thing, is a thing.

When you apply too much you could experience:

- caking
- residue on clothing
- less odor protection

When you find your perfect dose your jar will last longer and you'll have better coverage - smelling fresher for longer.

HOW TO:

Use a tad less than you think you need each day until you find your sweet spot.

2. APPLY WHEN WET

There's no need to dry off before applying! In fact, *you'll get your best application when your deodorant cream has an opportunity to really sink into your skin*, giving you a clear application and preventing powdery residue.

Applying to wet skin also helps with glide, making it easier to get good coverage with less cream.

HOW TO:

Apply right out of the shower, or spritz a bit of water, toner, or other gentle mist on your skin before applying.

THE RESULTS:

- no powdery residue
- no caking
- better performance
- no marks on clothes
- your jar of deodorant lasts longer!

3. DON'T GIVE UP

Real Talk: While our Deo works wonders for many, you may be one of the very few who will experience less than perfect odor protection right at the get-go or as a surprise after a few weeks of use.

The good news? If you can make it through the “detox” period (as it’s often referred to) you’ll often be rewarded with perfect performance once your body has adjusted to our formula.

HOW TO DETOX (AND SMELL GOOD):

- be sure to apply to *clean* skin each morning
- re-apply (to clean skin) as needed throughout the day
- drink lots of water
- sweat!

NOTE: If you experience a rash at any time, please discontinue use. This is most likely an allergy or sensitivity to an essential oil, not Detox.

WE'RE HERE FOR YOU
