## **“Practical laser solutions for the Dental Practice TODAY”**

---

The dental laser ..be it a soft tissue laser or hard tissue laser ... provides the user advantages over tradition dental procedures . In this seminar Dr.Labrecque will show how he has incorporated both the **diode ( soft tissue) and the erbium (hard tissue) laser** in all his dentistry for the last 20 years . He will cover ..

Restorative procedures

Periodontal protocols and procedures

Endodontic protocols

Soft tissue surgery: frenectomy and tongue release protocols

Low level laser protocols for before and after dental procedures

Peri-implantitis protocols and expectations

Dr Labrecque’s no nonsense approach will motivate you to use your laser in your dental practice and encourage you to add procedures that you may not be doing today .. once you understand the science anything is possible
