TV System	NTSC
Effective Pixels	976 (H) x 592 (V)
Minimum Illumination	0.1Lux
Viewing Angles	130°(H), 170°(D)
Operating Temperature	-4°F ~ 158°F
Operating Voltage	6V ~ 15V DC
Video Ext. / Buzzer Cable	24 feet

4. Wiring

5. Pedestrian and Vehicle Detection Area Adjustment

- The green loop on the camera pigtail.
 - If uncut, the AI detects all persons and vehicles in the camera view, no parking guidelines will be displayed, and no alarm will occur.
 - If cut, the alarm area will be shown, and alarm will sound when object(s) is in the alarm area. Alarm sound can be turned off using the volume control on the speaker.
- The alarm area is shaded in BLUE. When an object is in the alarm area, the alarm area color changes to RED and alarm sounds.

- To adjust the detection area, loosen the two screws next to the camera and tilt the camera up or down.
