

VTL171R

Concealed Mount License Plate Camera with Night Vision

1. Bill of Material

2. Specifications

- * Concealed Mount license Plate Camera With Night Vision
- * 600 TVL Horizontal resolution
- * Excellent Auto White Balance
- * Reverse/Non-Reverse image selectable
- * Parking Line on/off Selectable
- * 170 degrees wide viewing angle

3. Installation Tips

- 3-1. VTL171R is designed to work best on vehicles that have a license plate located at the center and above the rear bumper. If your vehicle has a plate location that is offset to the left side, right side or your plate is located under the bumper then the VTL171R may not provide optimum performance.
- 3-2. VTL171R bar-bracket is designed to be mounted behind the license plate so that only the camera is visible.
- 3-3. VTL171R is designed to use the existing License Plate mounting equipment.

4. Dimensions (Inches) & wiring

Please bench test before installation

** Monitor trigger ** when reverse backup light comes on it will trigger the monitor to switch to backup camera.
