5 How to install mirror monitor

5.1 Remove the original mirror

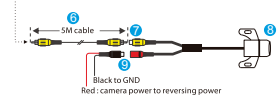

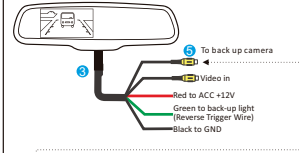

Different cars have different brackets. It depends on your vehicle maker and manufacturer. There are many methods to remove the original rearview mirror, however please don't force the mirror off the bracket. The manufacturer will not be responsible for damage caused to your car by wrong installation of the mirror.

5.2 Install mirror monitor on the plate

6 How to wire

After the mirror is mounted, you need to run the cable along the roof lining and down the pillar so you can connect to power and the rearview camera.

7 Back up camera display

When the car is in reverse, the monitor will automatically display backup camera.

A perfect reflective mirror

automatically display

8 Automatic brightness adjustment

When ambient light is weak, the screen will automatically reduce the brightness and get better for watching

When ambient light is strong, the screen will automatically increase the brightness and get better for watching
