RE-SELLER'S

PRICE LIST

A close-up photograph of several lavender flower spikes. The flowers are a vibrant purple color and are in various stages of bloom. The background is a soft, out-of-focus light purple, creating a dreamy and natural atmosphere. The overall composition is clean and aesthetically pleasing, suitable for a wellness or organic product advertisement.

*“Yesterday I was CLEVER, so I wanted to change THE WORLD.
Today I am WISE, so I am changing MYSELF.”*

– RUMI

“I love Organic Infusions Essential Oils, they are SUPERIOR on every level! I am truly grateful that you specialize in the highest quality essential oils so that I can experience the best health benefits! QUALITY is most important, it always matters especially with essential oils! I am considered an Aromatherapy Alchemist and a connoisseur and I have been involved in the healing arts and on a sacred journey, using, and blending essential oils since 1970! I have worked with many different sources for essential oils worldwide, and Organic Infusions essential oils are THE BEST, I HAVE SOURCED! I also appreciate the HIGH FREQUENCY of the oils, which is equally important to the quality! The quality of your essential oils is extremely consistent, which is rare! Offering such an amazing high quality, is a direct reflection of your CONSCIOUSNESS, COMMITMENT AND PASSION for providing the best! It is always a joyful experience to order your oils, Organic Infusions provides wonderful customer care and I feel that you are sincerely interested in service to your customers, to Mother Earth and the plant kingdom!”

-RE-SELLERS PRICING-

Organic Infusions is a bulk essential oil supplier who is committed to purity and sources their products from farms around the world. During inhalation of an authentic certified organic or wild harvested pure essential oil, you are connecting to the very life force of the plant. The energetic vibration of the plant unites with the body harmonics within each of us. Organic Infusions understands that when essential oils are altered by artificial means, the precious essence of those oils is forever changed. For this reason, Organic Infusions does not carry essential oils that have been diluted, altered, or synthetically modified. We offer bulk, volume discounts from our full line of therapeutic organics.

WHAT ARE ESSENTIAL OILS?

Essential Oils are highly concentrated aromatic extracts derived from plants through steam distillation, cold pressed process, CO2 extraction, or solvent extracted from a variety of plant material. Aromatic plants can be extracted from the following plant material: grasses, leaves, flowers, needles, twigs, peel of fruit, wood and roots.

HOW WE SELECT OUR OILS

Rose Heart, Certified Aromatherapist, Herbalist, and Founder of Organic Infusions inspects a sample of each oil before the batch for that season is approved to be sold by Organic Infusions. The following is Rose's 3 part approval process for testing each sample:

1

The oil must be the right aroma, color, and viscosity.

2

The oils are tested with a Gas Chromatographic Spectrometer to ensure that correct beneficial compounds are at the essential levels required for a true therapeutic effect.

3

The oil's Life Force must be alive with the vibration of the plant that connects with and enhances our emotional and physical well-being.

Certified Organic: Grown and processed in accordance with NOP standards and guidelines and is certified by Organic Certifiers

Wild Harvested: Grown and cultivated in the wild and NOT commercially farmed

REMEMBER, SAFETY FIRST.

Every season, batch samples are shipped from some of the finest oil distilleries and select farms from all over the world. Over the past 15 years, Rose Heart has embarked on a journey of hand selecting many of these farms and distilleries according to stringent guidelines.

The following is a list of criteria that Rose Heart, Certified Aromatherapist, Herbalist and Founder of Organic Infusions uses to select Pure Certified Organic and Wild Harvested Products:

1. Ecological and Sustainable Practices - must not damage the earth or surrounding community during the process of farming or distilling
2. No slave/child labor
3. No animal testing
4. The distiller and farm must have a thorough knowledge and practice of the correct time of day and season to harvest and distill essential oils for the best therapeutic effect
5. Organic Infusions, Inc chooses oils that are Certified Organic, Wild Harvested, Pesticide-Free.
6. The oil must be distilled at low temperature to maintain its therapeutic benefits
7. Organic Infusions never uses oils that have been denatured, reconstituted or mixed with other chemical compounds
8. No genetically modified organisms (GMOs)
9. No artificial colors, oils or scents

SYNERGISTIC BLENDS

Essential Oil Blends

RE-SELLERS PRICING

Organic Infusions Essential Oil Blends are created by the Founder, Rose Heart, Certified Aromatherapist.

They are infused with Pure, Certified Organic or Wild Harvested Essential Oils, Absolutes, and CO2 extracts – chosen for their unsurpassed quality. Each synergistic blend is created with the intention for a true therapeutic effect; however, they are remembered for their aromatic wonder.

PURE AROMATIC WATERS

Hydrosols

RE-SELLERS PRICING

Organic Infusions Hydrosols are powerful aromatic extracts that are produced when plants are steam distilled with pristine purified water by master distillers. As steam opens up the cellular pockets of plant material, a wondrous aromatic essence is released from these organically grown, freshly harvested plants. As a result, these therapeutic waters are infused with beneficial herbal elements and micro-molecules of essential oil.

WHAT ARE HYDROSOLS?

Hydrosols are the pure natural 100% non-alcoholic distillate that is produced during the distillation process that also extracts the essential oils. Hydrosol simply means, 'hydro' or water and 'sol' or solution, that is, the water solution that contains some of the water-soluble micro-molecules of essential oil as well as water-soluble plant components. These micro-molecules of essential oil give the hydrosol its scent and essential oil therapy and the plant components give the hydrosol its herbal or floral therapy. They are quite fragrant and have a pH of 4.5 to 5.5 or so.

Hydrosols are real aromatic therapy. You might consider them the homeopathy of aromatherapy. Just as herbs are to homeopathy so are essential oils to hydrosols. Hydrosols represent the true synergy of herbalism and aromatherapy.

When the fresh cut plants or flowers are put into the still, they are subjected to either boiling water, steam or both. The steam hits the plant, softens the scent-containing cells; the essential oil that is contained within the cell escapes as a vapor. This vapor mixes with the steam (the first part is the hydrosol) and goes through the gooseneck of the still apparatus and through the condensing coil, which is surrounded, by water. This cools the steam and vapor, which pours into the receiver as water and essential oil.

Due to the difference in specific gravity of essential oil and water, the condensate cools, the essential oil separates, floats to the surface of the water (hydrosol) and is removed leaving the hydrosol behind. However, not all of the water that comes over into the receiver is the hydrosol – only the first 25-50%. For every 1-2 lbs. of plant material, up to 1 quart of hydrosol is produced.

Organic Infusions, Inc Hydrosols contain only this first 25-50% potent aromatic distilled water.

To ease into sleep or soothe the stress of the day away, roll on the soothing floral aroma of Neroli. The sweet and floral aroma of Rose flows like a river as the sweet embrace opens the petals of your heart to love's full potential. Organic Infusions presents 12 sweet and floral aromas to choose from depending on your mood or pleasure!

ROLL-ONS

“We’ve been purchasing organic infusions essential oils and carrier oils for years! After tons of research on my part it was actually the first essential oil company that we bought from, and it’s our last. We love the quality of your oils and love that they are USDA certified organic! You also give loads of information about each oil which I personally love! Your oils are outstanding quality, beautifully packaged, with the tape around the top for extra protection, it shows you care a lot about your products.”

*"Thank you for the beautiful oils.
 I used the purification oil today.
 I love the packaging and the quality
 is obvious. I am sure I will be making
 future purchases. I would love to
 work with all the various oils.
 They hold great potential for healing.
 I can feel the effort of Rose's spirit
 behind the oils. Namaste,
 and thank you!"*

ULTRASONIC

Diffusers

RE-SELLERS PRICING

PERSONAL SPA DIFFUSER

The Personal Spa Diffuser uses high frequency ultrasonic technology that vibrates cool water inside the unit, creating an ultra-fine mist into the air. When essential oils are added, they are immediately dispersed into the air, providing immediate healthful benefits while helping to ionize the air. Our Personal Spa Diffuser can be used in a bedroom, living room, office area, or anywhere you want to create a relaxing, soothing environment.

FEATURES:

- + Small and compact
- + 6 soothing, rotating LED lights that change color automatically
- + BPA FREE
- + Up to 4 hr run time
- + Advanced & safe ultrasonic vapor diffusing technology

9 units \$47.00 per unit
 36 units \$42.00 per unit
 72 units \$37.00 per unit

“This is the most amazing diffuser I’ve ever tried. I love the look of it, and have gotten so many compliments already. Works so good and I am extremely impressed! I’m going to buy a few for my friends for their birthday with some essential oil blends from Organic Infusions also!”

JUDY B.

PROFESSIONAL DIFFUSER

ULTRASONIC, the simplest and most efficient way to enjoy aromatherapy without heat or a noisy pump. The most technologically advanced diffuser is our New Professional Diffuser. Safe, quiet, effective, and economical – compliments and enhances your office and home environment.

Our Professional Diffuser is BPA-free and features touch controls, a large 1300 ml tank, and utilizes high-frequency ultrasonic vibrations to create an ultra-fine aromatherapy mist. This diffusion method does not heat the oils, which maintains their integrity and holistic properties.

FEATURES:

- + New deco look, will incorporate into any decor
- + Low level LED lights, create relaxing ambient lighting with On/Off feature
- + Touch Controls
- + 1300 ml tank
- + BPA FREE
- + Up to 10 hr run time
- + Advanced & safe ultrasonic vapor diffusing technology with energy saving features

9 units \$62.00 per unit
 36 units \$55.00 per unit
 72 units \$48.00 per unit
